Litsa Spanos knows a thing or a thousand about making it in the art world. She's been a successful gallery owner for twenty-five years and has sold millions of dollars in original art and watched unknown artists, grow, flourish, and succeed. She has literally seen it all. And then some. And she has some insider secrets to share. (Okay, more like lots of them.) She believes that every artist should have the same opportunity to succeed and she wants to help as many artists as she can, while she can. So she put together an inspiring and informative book that will help the emerging artist, the mid-career artist, and the thriving or successful artist in equal measure. In this book you'll find everything you need to help you succeed. You'll also hear from other artists, gallery owners, tradeshow executives, and many

## **Conquering the Artists Struggle**

The tradition of painting is extraordinarily rich in imagination, invention, and skill and long after its advent, it still lies at the heart of art practice, inspiring generations of artists and enthusiasts alike. This book examines 100 of the most fascinating of such paintings by the world's greatest artists: the way they were made, what they do well, and how and what we can learn from them. With detailed analyses and instructive creative tips sections, you can learn how to convey movement like Degas, apply acrylic like Twombly, and command colour like Matisse. The book explores the act of vision in each artwork, describing how the images were created and including practical tips and advice, allowing you to weave some of this magic into your own work. The paintings are organized into chapters which cover the important genres: nudes, figures, landscapes, still life, heads, fantasy, and abstraction. Selected masterpieces serve as perfect examples of a particular quality in painting; light and shade, rhythm, form, space, contour, and composition are all covered in detail. Perfect for students as well as professional painters, and with a broad historical and global reach, this book is an indispensable introduction to the rich history and practice of painting.

What are the essential qualities of a great relationship? What do people in healthy and happy relationships do differently? Scientists and academics have spent entire careers investigating the nature of relationships, dating, and marriage, yet their findings are inaccessible to ordinary people, hidden in obscure journals read only by other academics. Now the bestselling author of the 100 Simple Secrets series has collected the most current and significant data from more than a thousand studies on relationships and spells out the key findings in plain English. The advice is not based on one person's unique experiences or opinions, but offers for the first time the research of noted scientists studying the lives and loves of average Americans. Each of the findings is accompanied by a true story that shows the results in action. Love is hard to calculate: Researchers have proven that a partner's age, income, education, and religion are unrelated factors in the likelihood of relationship satisfaction. Always trying to win can lead to a major loss: People who feel a sense of competition with their partner are 37 percent less likely to feel that their relationship is satisfying. Leave the past in the past: More than 40 percent of people report that jealousy over a previous relationship is a source of conflict in their current relationship.

If you've ever read any self-help books, you'll know that many of them are quite

the same. They talk about dealing with people, leading, managing, making money, making good decisions, building things, and cultivating the type of attitude that is necessary to have for success, among other things. So, there's a lot of common denominators in self-help books. If you read a top success book, however, they're a little bit different - a little bit more straightforward, a little bit more of the WEALTH mindset built into them, which is a no-nonsense, honest approach designed to maximize the reader's time. These books just want to give you the facts and the information needed to get the job done. This little summary covers a number of key topics, ideas, and concepts that will help you get into the mind of leaders like Trump, Pickens, Gates, Bezos, Google's Page, and other billionaire entrepreneurs. I am not a profiler, but you could call me a scientist of behavioral leadership and metaphysics. Mind you, I've read hundreds of books written by success gurus, world leaders, and billionaires, and, based on these observations, here are some of the fundamentals that make up the character of someone who makes it BIG. With the information in this book, you will be informed of how top performers think and, more importantly, how a self-made billionaire views you and your ethics. Don't forget that top leaders have been making billions for 20+ years and have been paying and leading thousands of employees for decades. They have been working tirelessly for decades to become the best they can be, improve their community, be a master builder and philanthropist, and defend his nation: thus, success is NO accident. This work was originally commissioned at the request of George Mentz at the conclusion of a 25-year research project based upon conversations of over 500 global leaders in over 50 countries, including such self-made giants as CEOs, inventors, MVP Athletes, world champions, presidents, bishops, kings, royalty, billionaires, and top gurus on the subject. The Law of Achievement was first delivered as a lecture, and part of this famous guidance was given in China, Arabia, Europe, India, Latin America, the West Indies, and throughout Asia. To go to the next level, read this book intently, contemplate the timeless wisdom contained, take action, and become a master of your destiny. This is the timeless framework for achievement and progress that has been proven to work over the last 25 years. "Belief is the energy that animates the wings of the soul." GM

### **Spotlight on the Art of Resilience**

"This book is a slice of intensified history—history as I saw it." So begins John Reed's first-hand account of the Bolshevik Revolution of 1917. Much anticipated when it was published in 1919, Reed's narrative remains as riveting today as when the events he describes were still reverberating throughout the world. Reed was hardly a disinterested observer, and his involvement in the Communist labor movement lends urgency and passion to his classic account. He vividly describes events in Petrograd in November 1917, when Vladimir Lenin and the Bolsheviks stormed the Winter Palace and seized the reins of power. Despite Reed's personal

leanings, which he made no attempt to hide, the book garnered praise from luminaries across the political spectrum. George F. Kennan, the American diplomat, and father of the policy of Soviet containment, said that "Reed's account of the events of that time rises above every other contemporary record for its literary power, its penetration, its command of detail. It will be remembered when all others are forgotten." Reed was committed to telling the story of the Russian revolution as truthfully as possible. That the book was banned by Russian premier Josef Stalin is a testament to the author's success in carrying out his mission. One hundred years after Russia and the world trembled, *Ten Days that Shook the World* brings alive the momentous events of 1917.

I have met numerous artists in my life, many of whom seem to be unfulfilled in their creative journey. I feel it is the same for many professionals. I personally believe that when we start on this path, we have great passion; a burning desire. This is what establishes the goals we want to achieve. These goals may consist of getting that job in the studio, or the project we wanted to do. We may find that once this happens, we become dormant, and stop setting those goals. It then turns
