performing and synch rights to sub-publishing, foreign rights, copyright basics, types of publishing deals, advice on representation and more. Get a view from the top, in plain English. This updated and revised edition has been prepared in light of the ever-changing landscape of music publishing, taking into account factors like illegal downloading and recent announcements from the Copyright Royalty Board. With an added "DIY" chapter, the author demonstrates why the playing field has changed for the traditional copyright administrators, and how musicians just starting out can protect their own work until they hit the big time.

contribution to the on-going discussion on religion and politics. The volume brings together over thirty leading scholars from a variety of disciplines such as political science, international relations theory, sociology, theology, anthropology, and geography. Utilising case studies, empirical investigations, and theoretical examinations, this book focuses on the complex roles that religions play in world affairs. It seeks to move beyond the simplistic narratives and overly impassioned polemics which swamp the discourse on the subject in the media, on the internet, and in popular nonfiction, by acting as a vessel for scholarly research on religion. The book presents a balanced analysis of the multifaceted roles taken on by religions, and religious actors, in global politics. Contributors: Stephen Dawson, Jodok Troy, Gertjan Dijkink, John A. Rees, Mark S. Cladis, Fabio Petito, Linda Woodhead, Jonathan Fox, Brendan Sweetman, Don Handelmann, Scott W. Air conditioning in vintage cars often falls into disrepair, as owners figure that it never really worked all that well when it was new, and assume that rejuvenation

would be prohibitively expensive. In his new book, *Just Needs a Recharge: The Hack Mechanic Guide to Vintage Air Conditioning*, Rob Siegel details exactly what's needed to resurrect long-dead air conditioning in a vintage car, or install a/c in a car that never had it. In a level of detail not found in any other automotive a/c book, Rob reveals what you need to know about flare and o-ring fittings, upgrading to a rotary-style compressor and a parallel-flow condenser, making or specifying custom hoses, and selecting refrigerant so that the a/c blows cold enough to be usable. Although the book draws from Rob's BMW experience (with specifics for the BMW 2002 and 3.0CS), and concentrates on vintage a/c systems (those that have flare fittings and originally contained R12), most of the information applies to any air conditioning system, foreign or domestic, vintage or modern. Written in Rob's entertaining Hack Mechanic narrative voice, and including 240 photographs and illustrations, the book covers theory, the choice of refrigerant (R12, R134a, other EPA-approved, non-EPA-approved), legality, tools for a/c work, fittings and sizes, the compressor, the evaporator assembly and expansion valve or orifice tube, the condenser and fan, the receiver/drier or accumulator, electrical connections and compressor cycling, connecting and using manifold gauges, the basic steps for a/c rejuvenation, from-scratch a/c retrofit, making and installing hoses, flushing the system, pressure-testing and leak detection, evacuating and charging the system troubleshooting, and other things that heat up the cabin.

Every year around the globe, people cross paths with avalanches-some massive, some no deeper than a pizza box-often with deadly results. Avalanche expert Jill Fredston stalks these so-called freaks of nature, forecasting where and when they will strike, deliberately triggering them with explosives, teaching potential victims how to stay alive, and leading rescue efforts when tragedy strikes. Having spent decades trying to keep avalanches and people apart, Fredston brings them

together unforgettably in Snowstruck. From a rare store of personal experience, she conveys a panorama of perspectives: a skier making what may prove his final decision, a victim buried so tightly that he can't move a finger, rescuers racing both time and weather, forecasters treading the line between reasonable risk and danger. Seamlessly interweaving these accounts, Fredston brings to life the awesome forces of nature that can turn the mountains deadly-and the equally inexorable forces of human nature that lure us time and again into treacherous terrain.

An index makes the manual easy to navigate.

Brought to Kenya from England as a child and then abandoned by her mother, Beryl is raised by both her father and the native Kipsigis tribe who share his estate. Her unconventional upbringing transforms Beryl into a bold young woman with a fierce love of all things wild and an inherent understanding of nature's delicate balance. But even the wild child must grow up, and when everything Beryl knows and trusts dissolves, she is catapulted into a string of disastrous relationships. Beryl forges her own path as a horse trainer, and her uncommon style attracts the

eye of the Happy Valley set, a decadent, bohemian community of European expats who also live and love by their own set of rules. But it's the ruggedly charismatic Denys Finch Hatton who ultimately helps Beryl navigate the uncharted territory of her own heart. The intensity of their love reveals Beryl's truest self and her fate: to fly. Set against the majestic landscape of early-twentieth-century Africa, McLain's powerful tale reveals the extraordinary adventures of a woman before her time, the exhilaration of freedom and its cost, and the tenacity of the human spirit.

With the 1998 debut of its V92C, Victory Motorcycles became the New American Motorcycle. Victory's innovative, stylish heavyweight cruiser motorcycles attracted a loyal, hard-riding following, but not the market share needed to survive. This book also features a full reprint of the collectible first Victory history from 1998, *The Victory Motorcycle*.

A deep river pit in Natchez, Mississippi, reputed to be the hiding spot for Jean Lafitte's hidden treasure and a dumping ground for numerous murder victims, becomes the site of a dangerous showdown for Penn Cage, in a tale beset by racial tension, betrayals and illicit sex. New Ground

Two thousand years after the Jewel of Peace ended the devastating Wizard Wars, chaos stalks the land again. The tyrant Broman lusts to take up the Stone and twist the world into his personal plaything. The Wizard Ord desires to find the Spirit that can control the weapon and manipulate it to his will. It falls to the humble mountaineer Geret to take up the mantle of a millenia-old battle and tame the Spirit he unwittingly inherits. As war savages the land anew and pits nation against nation, hope hangs by the thinnest thread; a mountaineer with Spirit against a centuries-old Wizard willing to use the Stone to smash the world asunder.

Travis Pastrana, the most celebrated freestyle motocross rider in the world, knows no bounds. In 1999 he celebrated his first X Games gold by launching his bike into San Francisco Bay. Three years later, he rode straight into the Grand Canyon. On purpose. In *The Big Jump: The Tao of Travis Pastrana*, he makes his biggest leap yet, revealing for the first time the methods (and madness) that fuel his amazing feats. At 14 Pastrana was the youngest World Freestyle Motocross champion. At 17 he was the youngest racer ever to represent Team USA in the Motocross des Nations. Each of *The Big Jump's* chapters builds toward another breathtaking accomplishment, ending with the "impossible" double backflip during X Games 12 that brought Pastrana not just gold but certified legend status. With a foreword by Mat Hoffman, the godfather of BMX, *The Big Jump* is a fuel-injected ride into the mind and heart of Travis Pastrana.
