It's graduation day for sixteen-year-old Malencia Vale, and the entire Five Lakes Colony (the former Great Lakes) is celebrating. All Cia can think about—hope for—is whether she'll be chosen for The Testing, a United Commonwealth program that selects the best and brightest new graduates to become possible leaders of the slowly revitalizing post-war civilization. When Cia is chosen, her father finally tells her about his own nightmarish half-memories of The Testing. Armed with his dire warnings (“Cia, trust no one”), she bravely heads off to Tosu City, far away from friends and family, perhaps forever. Danger, romance—and sheer terror—await.

King Richard III

CCIE and CCDE Evolving Technologies Study Guide

This book is intended to guide practicing structural engineers familiar with earlier ACI building codes into more profitable routine designs with the ACI 1995 Building Code (ACI 318-95). Each new ACI Building Code expresses the latest knowledge

of reinforced concrete in legal language for safe design application. Beginning in 1956 with the introduction of ultimate strength design, each new code offered better utilization of high-strength reinforcement and the compressive strength of the concrete itself. Each new code thus permitted more economy as to construction material, but achieved it through more detailed and complicated design calculations. In addition to competition requiring independent structural engineers to follow the latest code for economy, it created a professional obligation to follow the latest code for accepted levels of structural safety. The increasing complexity of codes has encouraged the use of computers for design and has stimulated the development of computer-based handbooks. Before computer software can be successfully used in the structural design of buildings, preliminary sizes of structural elements must be established from handbook tables, estimates, or experienced first guesses for input into the computer.

The spread of the teaching of Gautama Buddha began in India over two thousand years ago and reached perhaps its highest peak in the hidden mountain kingdom of Tibet, five centuries before our time. The great illuminary of his renaissance of the religion of total peace was Tsongkapa (1357 - 1419). He inspired a movement that by the time Tibet was lost in 1959 saw nearly a million monks living in thousands of monasteries around the country.
