Introduction to Linear Algebra

In 'Hebridean Sharker' Tex Geddes describes his exploits during the 1950s as a hunter of basking sharks in the waters of the Minch, between the Inner and Outer Hebrides. Using an adapted whaling harpoon, he and his crew stalked these huge fish often in perilous conditions, the liver of which is a valuable source of oil. Always a maverick, before World War Two Geddes had been a boxer and a rumrunner to Newfoundland. During the war he established a reputation as an expert knife-thrower and bayonet fencer and served in the Special Forces with Gavin Maxwell (author of Ring of Bright Water). He combined the hazardous pursuit of sharks with crewing the local lifeboat, ring-net fishing, lobstering, deer-stalking and salmon poaching. He went on to purchase the tiny island of Soay, where he lived with his wife Jeanne, continued to hunt sharks and became the Laird. His story is full of adventures and fantastic descriptions of a seagoing life in the islands. It has become a Hebridean classic.

Dionysus Crucified

Thielicke here studies the themes of doubt and appropriation in modern Protestant thought. A leading advocate of dialectical theology, Thielicke examines the work of the great German Protestant religious philosophers from Lessing and Schliermacher through Barth and Tillich, probing these theologians' understanding of their context and how this tradition can impact our own engagement with our times. Clear, finely nuanced, historically and philosophically mature, this is a vital reflection on the history of theology and in systematic theology.

Apologetics is for everyone. The Bible is clear that all believers are called to defend their faith. But what if apologetics could be part of natural, normal conversation—both from the pulpit and in everyday life? Aimed at preparing you to clearly and confidently defend your faith, Expository Apologetics sets forth an approach to apologetics that is rooted in Scripture and eminently accessible. Filled with real-world examples and practical advice, this book will equip you with the tools you need to think biblically and converse persuasively—offering unbelievers “a reason for the hope that is in you.”

The Accidental Life of Jessie Jefferson

Eighty of the finest poems on parenthood brought together in an endearing, intelligent and accessible anthology by editor Emma Neale. Attractively packaged to be of gift-book quality, this anthology is beautifully illustrated with outstanding photographs of babies and young children. Editor Emma Neale's approach is to bring together around 90 wonderful poems, both by New Zealand and international poets, which are accessible but also strong and important. Beautifully packaged, this volume features stunning photographs by well-known photographer Mark Smith. The Southern Ocean Review had this

to say: "Any book of parenthood is going to be welcome anywhere and this one certainly should be. Edited by Emma Neale, and with welcome photos by Mark Smith, this is a carefully presented volume of poems that will certainly be of great interest. I particularly like the work of Ruth Arnison and Joanna Paul, showing a side of them not many would know. Poems of a subject seem to draw out the best of some pretty well known poets familiar to us in different subject matter. Peter Bland's poems are mature and interesting - a sure hand here. And the photos are nothing short of brilliant. I am grateful for the biographical material too, to show who's who etc. Quite often in anthologies like this, it is left out. One has many memories of youth and this brings it all out for me. In 'Birdlings' the late Ruth Pettis shows some very deft technique which should be a lesson to all aspiring poets. I cannot find a single dud poem in all of these and thoroughly recommend this book for everyone to read."

The system of Feng-shui is of comparatively modern origin. Its diagrams and leading ideas are indeed borrowed from one of the ancient classics, but its method and practical application are almost wholly based on the teachings of Choo-he and others, who lived under the Sung dynasty (A.D. 1126-1278), and whose commentaries to the classics are read in every school. Choo-he's mode of thinking has in fact been adopted by modern Confucianism, and forms the philosophical basis of the whole system of Feng-shui Li, or the general order of nature, So, her numerical proportions, Hi, her vital breath or subtle energies, and Ying, her forms of appearance, constitute what is popularly called the system of Feng-shui. No Chinese work on Feng-shui, however--or at least none that I have seen or heard of--follows out this division methodically, though they all mention these four principles and give them here and there due prominence. On the other hand, this division of four branches of the Feng-shui system is not my own. A distinguished Cantonese scholar, a member of the Imperial College, mentions, in a preface which he wrote to a popular geomantic work, that the whole system of Feng-shui might advantageously be divided into the above-mentioned four parts. From this preface I have taken the hint, and propose now to set before my readers the system of Feng-shui, following out this fourfold plan, and working it out so that it should give them an insight into the whole system of Chinese natural science generally.

How to Draw and Paint Fantasy Architecture

On October 1, 1917, prohibition came into effect in the province of British Columbia. Washington and Oregon had gone dry the previous year. The ban on liquor sales led to deadly conflict and legal chaos in the Pacific Northwest, and the legacy of those "booze battles" continues into the 21st century. Rich Mole introduced readers to West Coast prohibition's pioneer years in *Scoundrels and Saloons: Whisky Wars of the Pacific Northwest, 1840-1917*. In *Rum-runners and Renegades*, he recounts the wild and wacky—and sometimes tragic—results of later prohibition laws through the exploits of both prohibitionists and prohibition-busters, among them Jonathan Rogers, a wealthy Vancouver builder and prohibition leader; the Billingsley brothers, a quartet of handsome bootleggers from Seattle; and enterprising Johnny Schnarr, Victoria's number-one rum-runner. From vicious marine hijackers and bedeviled police to corrupt politicians and frustrated drinkers on both sides of the border, this is an action-filled account of liquor and lawlessness on the West Coast.

Growing up in BC during the 1920s, young Fraser Miles never knew anything but poverty. There was no social stigma to being poor - most of his neighbours were not much better off - but in his late teens Miles began to look for a way to finance a career in the growing field of radio electronics. Not long after he was hired as radio operator on the Ruth B, the young man noticed that the alleged fishpacker was packing anything but fish. These were the Prohibition years; there was less money in freezing herring than there was in smuggling liquor to the thirsty multitudes south of the border. *Slow Boat on Rum Row* begins as a fascinating memoir of Fraser Miles' youth in the fledgling community of Mission on the Fraser River, a rugged milieu where beachcombing and cougar hunting were more important than high school in teaching a boy the hard facts of survival. Miles' account of his years on the rumboats, always one step, ahead of the law, is an exciting story of survival at sea. It is also a valuable addition to an episode of coast history that is little documented. After all, "rum runners, as a group," Miles writes, "made the Sphinx sound like a chatterbox."

The Great Conversation

The stories of The Lost Salt Gift of Blood are remarkably simple - a family is drawn together by shared and separate losses, a child's reality conflicts with his parents' memories, a young man struggles to come to terms with the loss of his father. Yet each piece of writing in this critically acclaimed collection is infused with a powerful life of its own, a precision of language and a scrupulous fidelity to the reality of time and place, of sea and Maritime farm. Focusing on the complexities and

abiding mysteries at the heart of human relationships, the seven stories of *The Lost Salt Gift of Blood* map the close bonds and impassable chasms that lie between man and woman, parent and child.

At the Altar of Sexual Idolatry

When the United States Government, with the advent of Prohibition turned off the tap that supplied alcohol to the thirsty masses, a determined group of men rose to the challenge- the Rumrunners! These men dared the sea and the might of the U.S. Coast Guard to pass the bottle from mother ships waiting in international waters to their accomplices on shore. Initially seen as a respectable crime, the rum trade evolved into cut-throat competition where the unwary smuggler was just as likely to lose his cargo to hijackers as he was to the Coast Guard. These are the stories that bring that time to life. From Johnny Schnarr, who spent twelve years outwitting the authorities, to the notorious Eggars Brothers and on to Roy Olmstead, the acknowledged King of the rumrunners, *Pass the Bottle* tells the stories that have become a part of the maritime history of the Pacific Northwest.

Monet Trouble

From the bestselling author of the critically acclaimed *The Greatest Game Ever Played* comes *The Grand Slam*, a riveting, in-depth look at the life and times of golf icon Bobby Jones. In the wake of the stock market crash and the dawn of the Great Depression, a ray of light emerged from the world of sports in the summer of 1930. Bobby Jones, an amateur golfer who had already won nine of the seventeen major championships he'd entered during the last seven years, mounted his final campaign against the record books. In four months, he conquered the British Amateur Championship, the British Open, the United States Open, and finally the United States Amateur Championship, an achievement so extraordinary that writers dubbed it the Grand Slam. A natural, self-taught player, Jones made his debut at the U.S. Amateur Championship at the age of 14. But for the next seven years, Jones struggled in major championships, and not until he turned 21 in 1923 would he harness his immense talent. What the world didn't know was that throughout his playing career the intensely private Jones had longed to retreat from fame's glaring spotlight. While the press referred to him as "a golfing machine," the strain of competition exacted a ferocious toll on his physical and emotional well-being. During the season of the Slam he constantly battled exhaustion, nearly lost his life twice, and came perilously close to a total collapse. By the time he completed his unprecedented feat, Bobby Jones was the most famous man not only in golf, but in the history of American sports. Jones followed his crowning achievement with a shocking announcement: his retirement from the game at the age of 28. His abrupt disappearance from the public eye into a closely guarded private life helped create a mythological image of this hero from the Golden Age of sports that endures to this day.

Linnaeus

This title provides a theoretically and methodologically new and distinct approach to gender through the frameworks of biopolitics and genealogy, theorising it as a historically specific apparatus of biopower. Through the use of a diverse mix of historical and contemporary documents, the book explores how the problematisation of intersex infant genitalia in 1950s psychiatry propelled the emergence of the gender apparatus in order to socialise sexed individuals into the ideal productive and reproductive subjects of White, middle-class postwar America.

This best-selling introductory text presents philosophy as an ongoing conversation about humankind's deepest and most persistent concerns. The Great Conversation traces the exchange of ideas between history's key philosophers, demonstrating that while constructing an argument or making a claim, one philosopher almost always has others in mind. Precalculus with Limits: A Graphing Approach, AP* Edition

Modern Faith and Thought

This wide-ranging study of British writers and poets of the 1930s—including Auden, Isherwood, Spender, Waugh, and Greene—examines the masterpieces of that momentous decade, not in linguistic isolation, but in the contexts—social, political, historical, ideological, and personal—in which they were composed. Cunningham maps out the dominant images and concerns, nothing less than the central obsessions and imposing images of the '30s imagination. He analyzes the obsession with violence, the "destructive element" of post-World War consciousness; the cult of youth, of schools and schoolmasters; the infatuation with heroes—flyers, mountaineers, and racing car drivers—and the related concern about "being small," weak, or neurotic in an age of mass politics. In order to illustrate this kaleidoscope of themes, Cunningham examines not only the canonical texts, but also "minor" forms and writings, including detective stories, films, and popular songs, showing how these neglected genres also illuminate the work of this period.
