She hasn't even seen Christian in over ten years, but a recent run-in with his grandfather during a rare visit home, resulted in a new condition to the will. Practical Monitoring

“A poignant expression of the durability, grace, and potential of the human spirit” set in a post-nuclear dystopia where words are worth killing for (Jean M. Auel, author of the Earth’s Children series). By the late twenty-first century, civilization has nearly been destroyed by overpopulation, economic chaos, horrific disease, and a global war that brought a devastating nuclear winter. On the Oregon coast, two women—writer Mary Hope and painter Rachel Morrow—embark on an audacious project to help save future generations: the preservation of books, both their own and any they can find at nearby abandoned houses. For years, they labor in solitude. Then they encounter a young man who comes from a group of survivors in the South. They call their community the Ark. Rachel and Mary see the possibility of civilization rising again. But they realize with trepidation that the Arkites believe in only one book—the Judeo-Christian bible—and regard all other books as blasphemous. And those who go against the word of God must be cleansed from the Earth . . . In this “thought-provoking” novel of humanity, hope, and horror, M.K. Wren displays “her passionate concern with what gives life meaning (Library Journal).

Textbook of Medical Biochemistry

You blunder into the grand opening of a new hospital, sign up to volunteer and, with considerable reluctance, let yourself be assigned to the ER. What starts as a Monday evening lark eventually becomes a life-changing experience. Your new course leads from the ER to becoming a volunteer EMT and, later, a paramedic and a perennial night school student. Eventually, at an age when others might be thinking of retiring to play golf, you quit your job, move away from home, and go back to

college as a physician assistant student with strangers less than half your age. This book details the often humorous experience that follows from a perspective that hopefully will help others follow their own paths, whatever they may be. Along the way, new experiences evoke old memories, while new friends, teachers, and patients teach important new lessons. The book comes full circle with a view of what it is like to be a PA, one of U.S. News & World Report's "50 hottest careers."

The Powers

The great eighteenth century portraitist comes to life in this "gritty, bawdy and funny" rags to riches novel told in the voice of the artist himself (The New York Times). William Hogarth was London's artist par excellence, and his work—especially his satirical series of "modern moral subjects"—supplies the most enduring vision of the ebullience, enjoyments, and social iniquities of the eighteenth century. And in I, Hogarth, he tells a ripping good yarn. From a childhood spent in a debtor's prison to his death in the arms of his wife, Hogarth recounts the incredible story of how he maneuvered his way into the household of prominent artist Sir James Thornhill, and from there to become one of England's best portrait painters.

Through his marriage to Jane Thornhill, his fight for the Copyright Act, his unfortunate dip into politics, and his untimely death, “the voice in which Dean’s Hogarth tells his own story is rich and persuasive . . . Like stepping into a Hogarth painting” (The New York Times). “A brilliant exercise in imagination and storytelling.” —Kirkus Reviews (starred review)

Nine Dayak Nights

This remarkable book provides a portrait of the lesser-known peoples of Sarawak, New Zealand: the Land Dayaks. Written by an anthropologist who came to know these people during a two-year stay in their remote village, the study--introduced by a folktale imparted to the author by the leading spirit-medium in the village--is a masterly analysis based on sound anthropological techniques and informed with understanding, affections, and humor. Geddes describes the life of the Land Dayaks--their traditions, beliefs, and their attitudes toward things around them--and reveals not only their differences from,

but also their similarities to the greater world of humanity outside their community. Originally published in 1957, this study has lost none of its freshness or fascination.
