Many people grimace at the sound of music theory. It can conjure up bad memories of grade school music classes, rattle the brains of college students, and make self-taught musicians feel self-defeated. Music Theory may seem tedious and unnecessary, especially since not many people can read music. Luckily, Music Theory for Dummies shows you the fun and easy way to understanding the concepts needed to compose, deconstruct, and comprehend music. This helpful

guide will give you a great grasp of: Note value and counting notes Treble and bass clefs Time signatures and measures Naturalizing the rhythm Tempo and dynamic Tone, color, and harmonics Half steps and whole steps Harmonic and melodic intervals Key signatures and circles of fifths Scales, chords, and their progressions Elements of form Music theory's fascinating history This friendly guide not only explores these concepts, it provides examples of music to compliment them so you can hear how they sound firsthand. With a bonus CD that demonstrates these ideas with musical excerpts on guitar and piano, this hands-on resource will prove to you that music theory is as enjoyable as it is useful. Don't get discouraged by the seemingly complicated written structure. With Music Theory for Dummies, understanding music has never been easier! Note: CD-ROM/DVD and other supplementary materials are not included as part of eBook file.

### **The Goodbye Lie**

This collection, Fairy Tales from the Arabian Nights presents a re-telling of some classic Middle Eastern and South Asian folk tales by E. Dixon – beautifully illustrated by John D. Batten. Whilst the narratives differ greatly in their origins, characters, and motifs – they all stem from the initial ‘frame story’ of the ruler Shahryār, and his wife Scheherazade. She tells a different tale each night, never revealing the ending – in order that the King may spare her life. Tales within this book include: ‘The King of Persia and the Princess of the Sea’, ‘Prince Beder and the Princess Giauhara’, ‘The Three Princes and Princess Nouronihar’, ‘Prince Ahmed and the Fairy’, ‘Prince Camaralzaman and the Princess of China’, ‘The Loss of the Talisman’, ‘The Seven Voyages of Sinbad the Sailor’ and others. John Dickson Batten (1860-1932) was a British painter, illustrator and print maker, who was a leading light in the Art Nouveau movement. He illustrated a series of fairy tale books written by Joseph Jacobs as well as this English language version of Arabian Nights, and Dante’s Inferno. His illustrations are strongly influenced by the printmakers of Japan and are characterised by an intense romanticism and refined technique. Presented alongside this text, Batten’s enchanting creations serve to

further refine and enhance the classic Arabian storytelling. Pook Press celebrates the great 'Golden Age of Illustration' in children's classics and fairy tales - a period of unparalleled excellence in book illustration. We publish rare and vintage Golden Age illustrated books, in high-quality colour editions, so that the masterful artwork and story-telling can continue to delight both young and old.

### **Blossom Magic**

The New York Times bestseller Sophia Amoruso spent her teens hitchhiking, committing petty theft, and dumpster diving. By twenty-two, she had resigned herself to employment, but was still broke, directionless, and working a mediocre day job she'd taken for the health insurance. Eight years later, she is the founder, CEO, and creative director of Nasty Gal, a \$100 million plus online fashion retailer with more than 350 employees. Sophia's never been a typical CEO, or a typical anything, and she's written #GIRLBOSS for outsiders (and insiders) seeking a unique path to success, even when that path is winding as all hell and lined with naysayers. #GIRLBOSS proves that being successful isn't about how popular you were in high school or where you went to college (if you went to college). Rather, success is about trusting your instincts and following your gut, knowing which rules to follow and which to break.
