This volume brings together a selection of papers written by Patricia Werhane during the most recent quarter century. The book critically explicates the direction and development of Werhane's thinking based on her erudite and eclectic sampling of orthodox philosophical theories. It starts out with an introductory chapter setting Werhane's work in the context of the development of Business Ethics theory and practice, along with an illustrative time line. Next, it discusses possible interpretations of the papers that have been divided across a range of themes, and examines Werhane's contribution to these thematic areas. Patricia H. Werhane is a renowned author and innovator at the intersection of philosophy and Applied Business Ethics. She is professor emerita and a senior fellow at the Olsson Centre for Applied Ethics at Darden and was formerly the Ruffin Professor of Business Ethics. She is also professor emerita at DePaul University, where she was Wicklander Chair in Business Ethics and director of the Institute for Business and Professional Ethics. A prolific author whose works include *Moral Imagination* and

She was a founding member and past president of the Society for Business Ethics and, in 2001, was elected to the executive committee of the Association for Practical and Professional Ethics. Before joining the Darden faculty in 1993, Werhane served on the faculty of Loyola University Chicago and was a Rockefeller Fellow at Dartmouth College and Senior Fellow at Cambridge University.

The Moral Imagination of Patricia Werhane: A Festschrift

How can countries conduct business in a responsible manner in countries where human rights abuses are widespread or where the environment is being degraded? Responsibility in World Business offers an approach to corporate decisionmaking based on just war theory (a moral justification for engaging in war) and the principle of double effect (PDE). PDE involves applying a set of guidelines to a proposed action to determine if that action is responsible and morally permissible--even though it will produce bad results along with the good. The book's proposed framework can be used as a tool for performance evaluation and as a set of guidelines for conducting business in an ethically responsible manner.

'This book is unique in setting the question of homosexuality in its historical, legal, political, and religious contexts in North America. It is no longer possible in Catholic ethics to address sexual morality with a model of absolute moral norms, immune from the ambiguities and complexities social justice issues introduce. Peddicord looks at the personal and social sides of homosexuality, and fairly examines all sides of the Roman Catholic response.' --Lisa Sowle Cahill, Boston College

While examining the important role of imagination in making moral judgments, John Dewey and Moral Imagination focuses new attention on the relationship between American pragmatism and ethics. Steven Fesmire takes up threads of Dewey's thought that have been largely unexplored and elaborates pragmatism's distinctive contribution to understandings of moral experience, inquiry, and judgment. Building on two Deweyan notions -- that moral character, belief, and reasoning are part of a social and historical context and that moral deliberation is

an imaginative, dramatic rehearsal of possibilities -- Fesmire shows that moral imagination can be conceived as a process of aesthetic perception and artistic creativity. Fesmire's original readings of Dewey shed new light on the imaginative process, human emotional make-up and expression, and the nature of moral judgment. This original book presents a robust and distinctly pragmatic approach to ethics, politics, moral education, and moral conduct.

How to Preach a Dangerous Sermon

John Paul Lederach's work in the field of conciliation and mediation is internationally recognized. As founding Director of the Conflict Transformation Program and Institute of Peacebuilding at Eastern Mennonite University, he has provided consultation and direct mediation in a range of situations from the Miskito/Sandinista conflict in Nicaragua to Somalia, Northern Ireland, the Basque Country, and the Philippines. His influential 1997 book *Building Peace* has become a classic in the discipline. This new book represents his thinking and learning over the past several years. He explores the evolution of his understanding of peacebuilding by reflecting on his own experiences in the field. Peacebuilding, in his view, is both a learned skill and an art. Finding this art, he says, requires a worldview shift. Conflict professionals must envision their work as a creative act - an exercise of what Lederach terms the "moral imagination."

Developing Moral Imagination

Philosophy with Teenagers

In commerce, many moral failures are due to narrow mindsets that preclude taking into account the moral dimensions of a decision or action. In turn, sometimes these mindsets are caused by failing to question managerial decisions from a moral point of view, because of a perceived authority of management. In the 1960s, Stanley Milgram conducted controversial experiments to investigate just how far obedience to an authority figure could subvert his subjects' moral beliefs. In this thought-provoking work, the authors examine the prevalence of narrow mental models and the phenomenon of obedience to an authority to analyse and understand the challenges which business professionals encounter in making ethical decisions. Obstacles to Ethical Decision-Making proposes processes - including collaborative input and critique - by which individuals may reduce or overcome these challenges. It provides decision-makers at all levels in an organisation with the means to place ethical considerations at the heart of managerial decision-making.

Ethical issues associated with public health and health policy--related, for example, to pandemic plans and vaccination policies (c.f. SARS or pandemic influenza), preventive measures like screening (e.g. for breast cancer or dementia) or health information campaigns, social inequalities or health care rationing--are increasing in worldwide importance. Evidence-based information for valid benefit-harm assessment is often rare and hard to get for participants in public health interventions. Program implementation often disregards requirements of fair decision-making processes (like public participation, transparency, etc.). Originating from an international conference (based on a call for abstracts and external review), this volume contains contributions from a group of experts from multiple disciplines and countries. It covers (i) conceptual foundations of public health ethics, (ii) methodological approaches and (iii) normative analyses of specific issues and cases. Bridging theoretical foundations with practical applications, this volume provides a valuable resource for researchers, practitioners and students concerned with public health practice and policy.

A distinguished moral philosopher and a leading interpreter of Kant's ethics, Barbara Herman draws on Kant to address timeless issues in ethical theory as well as ones arising from current moral problems, such as obligations to distant need, the history of slavery as it bears on affirmative action, and the moral costs of reparative justice. Challenging various Kantian orthodoxies, Herman offers a view of moral competency as a complex achievement, governed by rational norms and dependent on supportive social conditions. She argues that the objectivity of duties and obligations does not rule out the possibility of or need for moral invention. Her goal is not to revise Kant but to explore the issues and ask the questions that he

did not consider. Some of the essays involve explicit interpretation of Kant, and others are prompted by ground-level questions. For example, how should we think about moral character given what we know about the fault lines in normal development? If ordinary moral life is saturated by the content of local institutions, how should our accounts of moral obligation and judgment accommodate this?

Learn to use four characteristics of "preaching with moral imagination" to proclaim freedom for all. The author describes the four characteristics using examples like Robert F. Kennedy, Dr. Martin Luther King, Jr., Prathia Hall, and the Moral Monday Movement, along with musicians and other artists of today. Moral imagination helps the hearer to see what they cannot see, to hear what they cannot hear--to inhabit the lives of others, so that they can embody Christ and true freedom for those others. This book equips and empowers preachers to transcend their basic skills and techniques, so that their proclamation of the Word causes actual turnaround in the hearts and lives of their hearers, and in their communities.

"Frank Thomas has written a passionate summons: amid the current destructive chaos of our society there is an urgent need for moral imagination. Such imagination is the antithesis of "diabolic" and "idolatrous" imagination that is all to the fore in our public discourse and practice. Thomas fleshes out "moral imagination" with close reflection on the practice of Robert F. Kennedy and Martin Luther King. Before he finishes Thomas shows how the urgency of "moral imagination" belongs peculiarly to the work of the preacher. This book is a welcome call for gospel-grounded courage and truth about the neighbor issued in a way that refuses the self-serving fakery that dominates our public life." --Walter Brueggemann, Columbia Theological Seminary "Timely and prophetic, How to Preach a Dangerous Sermon presents a homiletic essential for our churches today.

Thomas insists that it is up to the preacher to recapture and reclaim the moral imagination of our nation so that the Gospel's message of freedom is true for all people. With attention to specific figures whose witness models the qualities and characteristics of moral imagination, Thomas inspires the preacher toward powerful proclamation that both challenges and critiques any speech that subjugates or subordinates. How to Preach a Dangerous Sermon is must read for preachers to recover and reimagine the leadership role of the church for the sake of justice for all." --Karoline M. Lewis, Associate Professor of Biblical Preaching and the Marbury E. Anderson Chair of Biblical Preaching, Luther Seminary; author of She: Five Keys to Unlock the Power of Women in Ministry. "In this lucid and compelling book, Frank Thomas plumbs the depths of American moral rhetoric for insights that will help preachers. How to Preach a Dangerous Sermon provides new and dramatic ways in which the moral imagination in a democratic society can be nurtured by visionary, empathic, wise, and artistic preachers."--John S. McClure, Charles G. Finney Professor of Preaching and Worship, Vanderbilt Divinity School "Warning: Preachers, if you are comfortable with the status quo of white privilege, patriarchy, hetero-normativity, and classism, do not read this book. If you are comfortable with sermon series that reduce the gospel to self-help acronyms, don't read this book. But if you have the courage to look honestly at our landscape and bring the moral imagination of the Christian tradition to bear on it, open these pages and your sermons may never be the same again. But then again neither will the church--or the world--be the same anymore, if enough of us follow Thomas's

Using path-breaking discoveries of cognitive science, Mark Johnson argues that humans are fundamentally imaginative moral animals, challenging the view that morality is simply a system of universal laws dictated by reason. According to the Western moral tradition, we make ethical decisions by applying universal laws to concrete situations. But Johnson shows how research in cognitive science undermines this view and reveals that imagination has an essential role in ethical deliberation. Expanding his innovative studies of human reason in *Metaphors We Live By* and *The Body in the Mind*, Johnson provides the tools for more practical, realistic, and constructive moral reflection.

competently and confidently work at the borders between ethics and the law. Criminal Justice Ethics offers a fresh new approach to considering ethical issues in a criminal justice context. Rather than simply offering a range of ethical dilemmas specific to various justice professionals, it provides extensive discussion of how individuals develop their 'moral imaginations' using ethical perspectives and practices, both as citizens of the world and as practitioners of justice. Starting from a consideration of the major ethical theories, this book sets the framework for an expansive discussion of ethics by moving from theory to consider the just society and the role of the justice professional within it. Each chapter provides detailed analysis of relevant ethical issues, and activities to engage students with the content, as well as review questions, which can be used for revision or examination. This book will help students to: understand the various theoretical approaches to ethics, apply these understandings to issues in society and the justice process, assist in developing the ability to investigate, discuss, and analyse current ethical issues in criminal justice, appreciate the diverse nature of ethical systems across cultures, outline strategies for detecting and resolving ethical dilemmas. Rich with examples and ethical dilemmas from a broad range of contexts, this book's multicultural approach will appeal not only to criminal justice educators, but also to academics, students and practitioners approaching criminal justice from sociological, psychological or philosophical perspectives.

The Moral Imagination

The essays gathered in *The Moral Imagination: How Literature and Films Can Stimulate Ethical Reflection in the Business World* show how, through literature, art, and film, society might learn to develop a sense of moral imagination. Cultivating the imagination through art, literature, and film illuminates our understanding of what it means to be human. By having a genuine sense of self, one can expand an impoverished moral vision and open the way for the greatness of heart that is needed to guide us through an ethical life in business. The focus on moral images in business ethics is credited, in part, to Aristotle. Some of these essays can be seen as arguing for a retrieval of the Aristotelian insight on ethics for the business ethics of our time. Ethics in this perspective is not primarily concerned with analyzing situations so that we can make correct decisions but rather with reflecting on what is constitutive of the good life. The fostering of this philosophical tradition can bring a crucial corrective to the way business ethics is practiced today.

The issues may change with the passing of the years, but the categories of concern change very little: sexuality and the sexes; medical decision-making; justice for the poor, the powerless, the underclass; reproductive decision-making; moral decision-making in business; and personal moral choices. Stevens attempts to present alternative positions on hotly debated new moral issues from a different standpoint, using an ethical pluralism approach. In doing this, he hopes to help readers arrive at their own non-polarized positions by learning from and respecting all parties in the discussion.

When it comes to thinking about war and warriors, first there was Achilles, and

then the rest followed. The choice of the term warrior is an important one for this discussion. While there has been extensive discussion on what counts as military professionalism, that is what makes a soldier, sailor or other military personnel a professional, the warrior archetype (varied for the various roles and service branches) still holds sway in the military self-conception, rooted as it is in the more existential notions of war, honor and meaning. In this volume, Kaurin uses Achilles as a touch stone for discussing the warrior, military ethics and the aspects of contemporary warfare that go by the name of 'asymmetrical war.' The title of the book cuts two ways-Achilles as a warrior archetype to help us think through the moral implications and challenges posed by asymmetrical warfare, but also as an archetype of our adversaries to help us think about asymmetric opponents.
