Inside a tent it's cozy. But what is going on outside? Is it dark? Is it scary? Not if you have your trusty flashlight! Told solely through images and using a spare yet dramatic palette, artist Lizi Boyd has crafted a masterful exploration of night, nature, and art. Both lyrical and humorous, this visual poem—like the flashlight beam itself—reveals that there is magic in the darkness. We just have to look for it.

Taking on Water

When Wendy Pabich received a monthly water bill for 30,000 gallons (for a household of two people and one dog), she was chagrined. After all, she is an expert on sustainable water use. So she set out to make a change. *Taking on Water* is the story of the author's personal quest to extract and implement, from a dizzying soup of data and analysis, day-to-day solutions to reduce water use in her life. She sets out to examine the water footprint of the products she consumes, process her own wastewater onsite, revamp the water and energy systems in her home, and make appropriate choices in order to swim the swim. Part memoir, part investigation, part solution manual, the book is filled with ruminations on philosophy, science, facts, figures, and personal behavioral insights; metrics, both serious and humorous, to track progress; and guidelines for the general public for making small (or perhaps monumental) but important changes in their own

lives. Told with humor and grace, *Taking on Water* offers a raw account of how deep we need to dig to change our wasteful ways.

Advanced Framing

Bring the Bible to Your Students like Never Before
Communicating the Scriptures is much like building a bridge. However, instead of ravines or rivers, the teacher must span both cultural boundaries and great gulfs of time between the present and the pasts of Moses, David, Jesus, and Paul. Though God's Word is always relevant, the teacher must help students see Scripture's vast treasures. The effective, engaging Bible teacher must, therefore, become creative. Together, Lawrence Richards and Gary Bredfeldt have created the ultimate guide to building bridges for those seeking to learn about God's Word. *Creative Bible Teaching* offers a five-step process by which Christian educators can construct a bridge across time, geography, and culture to help students of all ages connect with God's Word. This newly revised edition makes learning about God's Word more accessible for both teachers and students today. Simple, clear, and memorable, the method laid out in *Creative Bible Teaching* provides a sure-fire way of communicating God's Word in a way that sticks.

Starfish

Land Development Handbook

Among the most fascinating animals in the world's oceans are the more than 2,000 species of starfish. Called "Asteroids" by scientists who study them (after their taxonomic name, Asteroidea) or sea stars in some parts of the world starfish are easily recognized because of their star-like form. Starfish is a comprehensive volume devoted to the integrative and comparative biology and ecology of starfish. Written by the world's leading experts on starfish, the integrative section covers topics such as reproduction, developmental biology and ecology, larval ecology, and the ecological role of starfish as a group. The comparative section considers the biology and ecology of important species such as *Acanthaster planci*, *Heliaster helianthoides*, *Asterias amurensis*, and *Pisaster ochraceus*. Replete with detailed, scientifically accurate illustrations and the latest research findings, Starfish examines the important role of these invertebrates in the marine environment, a topic of great interest because of their impact on the food web. As major predators that are able to evert their stomach and wrap it around their prey, starfish can have a significant impact on commercial fisheries. Starfish are of interest not only to echinoderm specialists but also to marine biologists and invertebrate zoologists in general and, increasingly, to the medical community. A starfish's ability to regenerate body parts is almost unequalled in the animal world, making them ideal models for basic science studies on the topic. Contributors: Charles D. Amsler, Bill J. Creative Bible Teaching

Interactive Study Programs Make God's Word Come Alive. Why is the Bible, one of the bestselling books of all time, often left on our shelves gathering dust? Perhaps because we misunderstand the purpose of the Holy Scriptures. Our ScriptureWalk series is designed specifically for Catholic senior and junior high youth, to help them connect with the voice of God in their lives. Using dynamic, engaging, and active learning strategies to bring the Scriptures to life, ScriptureWalk invites teens to open their hearts by reflecting on how God appears to them through events and people. Each ScriptureWalk Senior High session is built on a Scripture passage, with a 45- to 60- minute Bible study, a 15- to 20-minute creative activity that applies the passage to teen life, and a 10- to 15-minute prayer service that brings the theme into group prayer. ScriptureWalk Junior High sessions are designed to serve younger adolescents with shorter attention spans: each 90-minute session changes often through various discussions, crafts, games, and creative prayer times to reflect on the Scriptures. This energetic program fits easily into the junior or senior high youth-group format. You can also use it to enhance your youth ministry in catechetical

sessions, weekly study groups, miniretreats, or Scripture classes. Each volume includes everything you need to plan a session your teens won't soon forget!
