Jeremy Paxman has created the perfect literary catch for fellow angling enthusiasts in this rich and varied anthology. Ten thoroughly entertaining themed chapters include 'Ones That Got Away', 'Ones That Didn't Get Away' and 'Fish That Bit Back'. Each is introduced by Paxman's own sharp, humorous observations and features both contemporary and historical writing about fishing in prose and verse, covering everything from tench tickling to piranha attacks. Some pieces are well known favourites, others are obscure, every one is a delight. 'A superb compilation because it roams from carp to cod, trout to tarpon and does not regurgitate the same old clippings. Paxman has clearly read widely and wisely in putting this together probably the definitive anthology of angling writing.' Keith Elliott, Independent on Sunday.

A Complete Guide to Carp Fishing for Beginners

"Being of these hills," James Still writes in his poem, Heritage, "being one with the fox . . . I cannot pass beyond." A thread that winds through the essays in this book is this notion of being able to take the boy out of the hills but not the hills out of the boy. The essays are not only about eastern Kentucky. They are about seeing and experiencing things through an eastern Kentucky filter no matter how far and wide the author has travelled.

The Secret Carp

This book has been written as a reference on coarse fishing float rigs, ledger rigs and carp rigs. It contains diagrams and descriptions of dozens of rigs used to catch coarse fish. The purpose of the book is to help with rig selection taking into account weather and water conditions. It is aimed at anglers with a basic understanding and some prior knowledge of coarse fishing. It is split into three sections of float fishing, ledger fishing and carp fishing. The rigs have all been carefully chosen to only include the most useful, effective and safe fishing rigs.

Carp Fishing Manual

Here is a guide to the most revolutionary development in British angling for many years: fly-fishing for trout and grayling in the very centre of towns and cities throughout the United Kingdom. From Sheffield to South London, from Merthyr Tydfil to Edinburgh, this is the cutting edge of 21st century fishing. Nothing is more surreal yet exhilarating than casting a fly for iconic clean-water species in the historic surroundings of our most damaged riverscapes - centres of post-industrial decay, but now also of rediscovery and regeneration.* fishing-focused profiles of 50 selected streams* interviews with local conservationists dedicated to restoring the urban rivers* local flies and emerging traditions, and* details of how to get involved and support this restoration work. This book guides readers towards relaxing, good-value fishing on their own doorsteps as a viable alternative to more costly (and carbon-intensive) destination angling: a positive lifestyle choice in challenging moral and economic times. No one author or publisher has yet attempted to bring this emerging trend of urban flyfishing into a single, epoch-making volume.**A donation from all sales goes to the Wild Trout Trust and the Grayling Society **

Discover Carp Fishing

Did you leave your rods at home before relocating to Hong Kong, unaware that such a densely populated place could support recreational fishing? The authors walk you through the local angling spots and describe key tactics. Carp fishing, pier fishing, and trolling for game fish are just some of the topics covered in a descriptive, beautifully illustrated text. This book will encourage you to get out onto Hong Kong's beautiful waters and cast a line.

Tactical Fly Fishing

In 1932, a farmer named George Washington Perry decided it was too rainy to plow and went fishing. That day, George landed the largest largemouth ever recorded—twenty-two pounds four ounces. The fish has inspired and frustrated hundreds of anglers for decades. They've dedicated their lives to the pursuit of "Sowbelly"—a nearly mythical fish, whose swinelike girth holds the key to their dreams. From an L.A. cop who came within ounces of besting the record to an Alabaman who has lost his marriage and his daughter to this pursuit, Burke takes readers along for the ride in this legendary race.

Rigs and Knots for Coarse and Carp Fishing

Carp anglers talk about watercraft all the time. But what exactly is that? Some would say it's applying understanding of the environment in which the carp lives and the fish itself to catch more of them. And how do we improve our watercraft?

By studying how the behaviour of the carp changes as environmental variables fluctuate daily and seasonally. We can do this by spending time on the lake or river bank and by reading about it. Carp Fishing Science is unlike all other carp fishing books. It provides information which the angler can use in order to anticipate changes in the carp's behaviour, especially those related to nutrition and activity, therefore helping to improve the reader's watercraft. Jon Wood, marine biologist and experienced fish farm consultant, has written a book which looks at carp fishing from a very different point of view from all other publications; from that of the fish rather than the fisherman, which is really where it should be from. In Carp Fishing Science, he presents a distillation of more than two hundred scientific publications and has extracted the most valuable proven facts about the fish to allow the reader to know the animal in greater detail, modify strategies and put more fish on the bank. This book bridges a gap between that which has until now only been supposed and that which has been shown through scientific studies. The author delves into aspects of carp biology, fish physiology and environmental science in order to clarify some of the myths surrounding carp fishing and answers questions such as why and how carp feed, which substances have been shown to cause a positive feeding response to carp, how the fish uses each of its senses and how the nutritional requirements of the carp change through the year. If you are a carp angler, a carp producer, a bait maker, a fisheries student, or just someone who has always wanted to think like a fish, then this book should be in your collection.

Carp Fishing Science

This full colour illustrated guide to carp fishing contains everything the beginner needs to know, from buying the right tackle and choosing the best type of carp water for a beginner, to the tackle, baits and techniques that will make you a successful carp angler. Fully illustrated chapters explain tackle and bait, with diagrams and instructions for making carp rigs, advice on casting and how to play, land and safely release carp. Tactics for catching stillwater and river carp are covered, together with tips for stalking, night fishing, long stay sessions and winter carp fishing. Like any sport carp fishing takes time and practice to learn, but if you pick the right fishery and approach it correctly using the information in this book, there is every possibility that you could catch a carp on your first trip! If you are a complete beginner and have never fished before, or you are an experienced coarse angler who wants to take up carp fishing, this book will tell you everything you need to know.

Fox Guide to Modern Pike Fishing

Carp fishing is the biggest growth area in coarse fishing. Specimen carping takes a specialist approach that sees dedicated anglers going in search of the biggest carp to inhabit lakes, rivers and canals. Once considered a niche following that only appealed to a small hard-core group of fanatics, the popularity of carp fishing has grown - and continues to grow - at a frightening pace. An increasing number of tackle companies, fisheries and tackle shops now base their entire business around carp fishing specialization and the "bug" has spread beyond Britain into the whole of western, central and eastern Europe. This sister manual to Coarse Fishing manual will show the growing band of carping disciples how to catch them through

over 500 illustrations and accompanying text.

The Beekay Guide to Carp Rigs

This is an economy version of Rigs and Knots for Coarse and Carp Fishing by Paul Duffield containing all of the content present in the original book, but in a revised layout with greyscale illustrations to reduce the page count and the retail price. Rigs and Knots for Coarse and Carp Fishing is a guide to the various float rigs, leger rigs and knots that an angler needs to know, to catch coarse fish in a variety of stillwaters and rivers. Float and leger rigs for all kinds of stillwater fisheries are explained, together with guidance on float choice, shotting patterns, casting and feeding. Commercial carp fisheries and more traditional carp waters are catered for, with rigs for pellet wagglers, surface fishing, bolt rigs, chod rigs, zig rigs, helicopter rigs and how to fish 'the method' or tie a hair rig. The essential river floats are covered, with advice and illustrations that will help you to choose the right float on the day and know how to use it. From long trotting with a stick float to fishing slow deep swims with an avon, coping with fast flows with a balsa or fishing big baits with a chubber, there are rigs for rivers of all sizes and characters. There is also a chapter on float and leger rigs for catching predators such as pike and zander, as well as a chapter with diagrams and instructions for tying the essential knots for anglers, including making loops, joining line and tying hooks. This is a book to be used and referred to and would be an invaluable source of information for your fishing trips.
