Start with the Person in the Mirror

Living in this world can be hazardous to one's health. Struggles to deal with pain and suffering drive a number of people to counselors, pastors, and popular "how to" books on Christian living to find healing. The experience of feeling deeply wounded by life's events not only hinders people from enjoying life, it also undermines the idea that God has a plan for our lives that surpasses many of our wildest dreams. Grappling with the place of God's grace in our lives, how to effectively deal with our problems, and attaining authenticity of being and purpose in life blend into our daily walk as followers of Christ. Building upon the belief that there is far more to the Christian life than simply making it into heaven, *Open My Heart, Heal My Soul: Living the Grace-Saturated Life* helps readers who have found the journey of life to be frustrating and painful gain new insight into living. This book will inspire those who have felt discouraged by their attempts to overcome problems and provide guidelines for dealing with life's challenges as a Christian.

Today we are in a healthcare crisis. All around the industrialized world people are struggling with declining health. From childhood obesity to the multiple health-related needs and concerns of an aging population, millions need help understanding, managing, or even reversing their maladies. Hospitals are essential of course, but most are set up for episodic care, not long-term disease management or continuous health improvement. So healthcare organizations, civic leaders, church leaders, and philanthropic groups wonder what can be done to help. In this timely publication, authors Stephanie Lind of Florida Hospital and Dr. Susan Chase of the University of Central Florida share important insights and ideas based on a three-year pilot project involving Faith Community Nurses. Conducted in five Central Florida churches, the pilot sought to help congregations establish or grow an existing health ministry team. The work was accomplished through a partnership between Florida Hospital and the Winter Park Health Foundation. In these pages you'll discover the project goals, the methodology and processes used, and how others can take what was learned and do something similar—or better. The project described in this report was one among many of Florida Hospital's ongoing efforts to help people understand how practicing the fundamentals of whole-person health aids in the prevention of disease and in recovery following an illness. I believe the authors have done a remarkable job of demonstrating how hospitals, churches, and Faith Community Nurses can

positively affect the health of entire communities, playing a part in transforming our healthcare crisis into a health caring opportunity.

God Speaking in the First Person in His Kingdom

Hermann Langbein was allowed to know and see extraordinary things forbidden to other Auschwitz inmates. Interned at Auschwitz in 1942 and classified as a non-Jewish political prisoner, he was assigned as clerk to the chief SS physician of the extermination camp complex, which gave him access to documents, conversations, and actions that would have remained unknown to history were it not for his witness and his subsequent research. Also a member of the Auschwitz resistance, Langbein sometimes found himself in a position to influence events, though at his peril.

People in Auschwitz is very different from other works on the most infamous of Nazi annihilation centers. Langbein's account is a scrupulously scholarly achievement intertwining his own experiences with quotations from other inmates, SS guards and administrators, civilian industry and military personnel, and official documents. Whether his recounting deals with captors or inmates, Langbein analyzes the events and their context objectively, in an unemotional style, rendering a narrative that is unique in the history of the Holocaust. This monumental book helps us comprehend what has so tenaciously challenged understanding.

Open My Heart, Heal My Soul

The third edition of this popular reader reflects considerable changes. With over seventy readings representing a wide diversity of theorists, it offers a breadth of coverage not available in other collections. The framework for understanding theory as a set of conversations over time is maintained and deepened, with a focus on key transitional theorists who helped pave the way from classical to contemporary theory. New contextual and biographical materials surround the primary readings, and each chapter includes a study guide with key terms, discussion questions, and innovative classroom exercises. The result is a fresh and expansive take on social theory that foregrounds a plurality of perspectives and defines contemporary trends in the field, while being both an accessible and manageable teaching tool.

THE PEOPLE IN OUR PATH

The growing exploration of political life from an aesthetic perspective has become so prominent that we must now speak of an “aesthetic turn” in political thought. But what does it mean and what makes it an aesthetic turn? Why now? This diverse and path-breaking collection of essays answers these questions, provoking new ways to think about the possibilities and debilities of democratic politics. Beginning from the premise that politics is already “aesthetic in principle,” the contributions to *The Aesthetic Turn in Political Thought* from some of the world's leading political theorists and philosophers, disclose a distinct set of political problems: the aesthetic problems of modern politics. The aesthetic turn in political thought not only recognizes that these problems are different in kind from the standard problems of politics, it also recognizes that they call for a different kind of theorizing – a theorizing that is itself aesthetic. A major contribution to contemporary theoretical debates, *The Aesthetic Turn in Political Thought* will be essential reading to anyone interested in the interdisciplinary crossroads of aesthetic and politics.

Strategic Interventions for People in Crisis, Trauma, and Disaster enables therapists to walk into difficult situations with a thorough understanding of interactional dynamics and a plan of action. With the stressful turbulence of our present culture, more and more clinicians are called upon to intervene in crisis situations. Violent interactions, once considered rare or beyond the province of the therapist, have become familiar events to many practitioners. This volume provides them with both the theoretical background and practical techniques to help people learn from crisis experiences and move toward change and

growth. Of special interest are practical guidelines and specific intervention strategies for conducting psychotherapy with different types of violent persons and of victims. Treatment principles for each crisis situation are then illustrated in detailed case studies. As the authors demonstrate, with these troubled people a therapist must be ready to make quick decisions, draw upon all available resources from the family and community, and offer continuing support as traumas are worked through and new behavior patterns are learned. In addition, the authors discuss the legal and ethical responsibilities of the therapist.

Pick Me Up How to turn a mistake into a strength builder

The 'demotic turn' is a term coined by Graeme Turner to describe the increasing visibility of the 'ordinary person' in the media today. In this dynamic and insightful book he explores the 'whys' and 'hows' of the 'everyday' individual's willingness to turn themselves into media content through: · Celebrity culture, · Reality TV, · DIY websites, · Talk radio, · User-generated materials online. Initially proposed in order to analyse the pervasiveness of celebrity culture, this book further develops the idea of the demotic turn as a means of examining the common elements in a range of 'hot spots' in debates within media and cultural studies today. Refuting the proposition that the demotic turn necessarily carries with it a democratising politics, this book examines the political and cultural function of the demotic turn in media production and consumption across the fields

of reality TV, print and electronic news and current affairs journalism, citizen and online journalism, talk radio, and user-generated content online. It examines these fields in order to outline a structural shift in what the western media has been doing lately, and to suggest that these media activities represent something much more fundamental than contemporary media fashion.
