IB Business Management Course Book 2014 edition

“Brave, honest, and necessary.”—Nancy Pearl, NPR Seattle Kayla Williams is one of the 15 percent of the U.S. Army that is female, and she is a great storyteller. With a voice that is “funny, frank and full of gritty details” (New York Daily News), she tells of enlisting under Clinton; of learning Arabic; of the sense of duty that fractured her relationships; of being surrounded by bravery and bigotry, sexism and fear; of seeing 9/11 on Al-Jazeera; and of knowing she would be going to war. With a passion that makes her memoir “nearly impossible to put down” (Buffalo News) Williams shares the powerful gamut of her experiences in Iraq, from caring for a wounded civilian to aiming a rifle at a child. Angry at the bureaucracy and the conflicting messages of today’s military, Williams offers us “a raw, unadulterated look at war” (San Antonio Express News) and at the U.S. Army. And she gives us a woman’s story of empowerment and self-discovery.

IB Business and Management

The notion of responsible business has infiltrated our markets, and "going green" is now a part of our mindset. But, sustainability as we know it is not enough. Flourishing—the aspiration that humans and life in general will thrive on the planet forever—should be a key goal for every business today. This is a bold concept, like sustainability was a decade ago. Just as sustainability has become a matter of course, so too will flourishing become a cornerstone of business tomorrow. How are companies to attain this big-picture goal? Drawing together decades of research along with in-depth interviews, *Flourishing Enterprise* argues that many strategic, organizational, and operational efforts to be sustainable reach the potential of flourishing when they incorporate one additional ingredient: reflective practices. Offering more than a dozen such practices, this book leads readers down a path to greater business success, personal well-being, and a healthier planet. Readers will find that adding reflective practices to existing business efforts does not require more work; it simply changes the way we do our work and, more importantly, the results we achieve. Cultivating emotional and spiritual health is the next frontier; this future-oriented guide develops these core competencies while stretching the ongoing conversation about profitable, sustainable business.

Fundamentals of Business (black and White)

Business and Management for the IB Diploma

The 2013 IB HL Economics syllabus change introduced Paper 3, an essentially calculations-based assessment. This development challenged teachers and students alike, as few Paper 3 practice resources have been available. This is furthermore an area of the syllabus where, as in Mathematics, practice is fundamentally important in developing the skills and confidence for needed for success. Paul Hoang's latest publication therefore represents an invaluable resource in helping students to prepare for the examination challenges they face.

Mass tourism is one of the most striking developments in postwar western societies, involving economic, social, cultural, and anthropological factors. For many countries it has become a significant, if not the primary, source of income for the resident population. The Mediterranean basin, which has long been a very popular destination, is explored here in the first study to scrutinize the region as a whole and over a long period of time. In particular, it investigates the area's economic and social networks directly involved in tourism, which includes examining the most popular spots that attract tourists and the crucial actors, such as hotel entrepreneurs, travel agencies, charter companies, and companies developing seaside resort networks. This important volume presents a fascinating picture of the economics of tourism in one of the world's most visited destinations.

The thirty-five chapters in this book describe various judgmental heuristics and the biases they produce, not only in laboratory experiments but in important social, medical, and political situations as well. Individual chapters discuss the representativeness and availability heuristics, problems in judging covariation and control, overconfidence, multistage inference, social perception, medical diagnosis, risk perception, and methods for correcting and improving judgments under uncertainty. About half of the chapters are edited versions of classic articles; the remaining chapters are newly written for this book. Most review multiple studies or entire subareas of research and application rather than describing single experimental studies. This book will be useful to a wide range of students and researchers, as well as to decision makers seeking to gain insight into their judgments and to improve them.
