Story-Based Inquiry: A Manual for Investigative Journalists

In the World Library of Psychologists series, international experts present career-long collections of what they judge to be their finest pieces – extracts from books, key articles, salient research findings, and their major practical theoretical contributions. The Selected Works of Professor Ray Bull include some of the most influential insights into the psychology of investigative interviewing. Whether it has been determining whether a suspect is lying or telling the truth, enabling children to provide reliable testimony, or understanding how the dynamics of the interview process itself can affect what is achieved, Professor Bull has been at the forefront in researching this fascinating area of applied psychology for over 40 years, his work informing practice internationally. An elected Honorary Fellow of the British Psychological Society and the first Honorary Life Member of the International Investigative Interviewing Research Group, Professor Bull also drafted parts of the government's Memorandum of Good Practice and of Achieving Best Evidence on Video Recorded Interviews with Child Witnesses for Criminal Proceedings. Including a specially written introduction in which Professor Bull reflects on a wide-ranging career and contextualises how the field has evolved, this collection will be a valuable resource for students and researchers of forensic psychology.

The wait for The Mueller Report is over. This strikingly designed edition has been prepared by expert typographers – allowing for an optimised, immersive reading experience. "From the moment [the report] was published, two separate news universes took shape. In one, the special counsel's report was presented as a smoking-gun chronicle of high crimes and misdemeanours. In the other, it was heralded as a credibility-shredding blow to the president's opponents."—The Atlantic Make up your own mind. The Mueller Report is a must read political blockbuster.

How to Wake Up

In this volume of 15 articles, contributors from a wide range of disciplines present their analyses of Disney movies and Disney music, which are mainstays of popular culture. The power of the Disney brand has heightened the need for academics to question whether Disney's films and music function as a tool of the Western elite that shapes the views of those less empowered. Given its global reach, how the Walt Disney Company handles the role of race, gender, and sexuality in social structural inequality merits serious reflection according to a number of the articles in the volume. On the other hand, other authors argue that Disney productions can help individuals cope with difficult situations or embrace progressive thinking. The different approaches to the assessment of Disney films as cultural artifacts also vary according to the theoretical perspectives guiding the interpretation of both overt and latent symbolic meaning in the movies. The authors of the 15 articles encourage readers to engage with the material, showcasing a variety of views about the good, the bad, and the best way forward.

African Journal of Political Science

Howard Zehr is the father of Restorative Justice and is known worldwide for his pioneering work in transforming understandings of justice. Here he proposes workable principles and practices for making Restorative Justice possible in this revised and updated edition of his bestselling, seminal book on the movement. (The original edition has sold more than 110,000 copies.) Restorative Justice, with its emphasis on identifying the justice needs of everyone involved in a crime, is a worldwide movement of growing influence that is helping victims and communities heal, while holding criminals accountable for their actions. This is not soft-on-crime, feel-good philosophy, but rather a concrete effort to bring justice and healing to everyone involved in a crime. In *The Little Book of Restorative Justice*, Zehr first explores how restorative justice is different from criminal justice. Then, before letting those appealing observations drift out of reach into theoretical space, Zehr presents Restorative Justice practices. Zehr undertakes a massive and complex subject and puts it in graspable form, without reducing or trivializing it. This resource is also suitable for academic classes and workshops, for conferences and trainings, as well as for the layperson interested in understanding this innovative and influential movement.

Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

The Churchman

Deeply stratified settlements are a distinctive site type featuring prominently in diverse later prehistoric landscapes of the Old World. Their massive materiality has attracted the curiosity of lay people and archaeologists alike. Nowadays a wide variety of archaeological projects are tracking the lifestyles and social practices that led to the building-up of such superimposed artificial hills. However, prehistoric tell-dwelling communities are too often approached from narrow local perspectives or discussed within strict time- and culture-specific debates. There is a great potential to learn from such ubiquitous archaeological manifestations as the physical outcome of cross-cutting dynamics and comparable underlying

forces irrespective of time and space. This volume tackles tells and tell-like sites as a transversal phenomenon whose commonalities and divergences are poorly understood yet may benefit from cross-cultural comparison. Thus, the book intends to assemble a representative range of ongoing theory - and science -based fieldwork projects targeting this kind of sites. With the aim of encompassing a variety of social and material dynamics, the volume's scope is diachronic - from the Earliest Neolithic up to the Iron Age-, and covers a very large region, from Iberia in Western Europe to Syria in the Middle East. The core of the volume comprises a selection of the most remarkable contributions to the session with a similar title celebrated in the European Association of Archaeologists Annual Meeting held at Barcelona in 2018. In addition, the book includes invited chapters to round out underrepresented areas and periods in the EAA session with relevant research programmes in the Old World. To accomplish such a cross-cultural course, the book takes a case-based approach, with contributions disparate both in their theoretical foundations - from household archaeology, social agency and formation theory - and their research strategies - including geophysical survey, microarchaeology and high-resolution excavation and dating.

The Universalist Leader

Information—Consciousness—Reality

This book shows readers how to cultivate a mindset that embraces stress, and activate the brain's ability to learn from challenging experiences.

Rhetorical Criticism and Theory in Practice

This book is based on an expert group meeting entitled 'Male Roles and Masculinities in the Perspective of a Culture of Peace', which was organised by UNESCO in Oslo, Norway in 1997, the first international discussion of the connections between men and masculinity and peace and war. The group consisted of researchers, activists, policy makers and administrators and the aim of the meeting was to formulate practical suggestions for change. Chapters in the book consist of both regional case studies and social science research on the connections of traditional masculinity and patriarchy to violence and peace building. The Culture of Peace initiatives in this book show how violence is ineffective, and the book contests the views in the socialisation of boy-children that aggressiveness, violence and force are an acceptable means of expression.

Strengthening Forensic Science in the United States

Rarely has an author illuminated in one book an aspect of religious study with attention to so many disciplines. John Hoffman skilfully interrelates the fields of psychology, mythology, anthropology, literature, and New Testament studies to show their common use of narration techniques. Hoffman explains how the storytelling nature of myths, parables, and psychotherapy seeks to heal and to bring wholeness to both the individual and to a social grouping. Bringing into this discussion the tension between law, the stabilizing factor of a society, and freedom, the spontaneous and creative urges that move outside of social order, Hoffman shows how rituals function to affirm the order of the culture in which they exist, yet, as they open up the realm of the imagination, they provide the possibility for disruption. For as long as fantasy is a part of narration (both in telling and hearing) the social order can be both criticized and superseded. Hoffman clearly sets his work within the genre of Crossan, Perls, Jaffe, Turner, Grimes, Buechner, and Eliade. Carefully examining the work of Tom Driver and John Cobb, he expresses the need to go beyond traditional structures and formulations in order to move theology closer to narrative. A narrative form, Hoffman argues, can both affirm faith and invite believers to transcend its expression and break free of its strictures, providing for an ever more dynamic theology.

Male Roles, Masculinities and Violence

In *The Interpretation of Cultures*, the most original anthropologist of his generation moved far beyond the traditional confines of his discipline to develop an important new concept of culture. This groundbreaking book, winner of the 1974 Sorokin Award of the American Sociological Association, helped define for an entire generation of anthropologists what their field is ultimately about.

This open access book chronicles the rise of a new scientific paradigm offering novel insights into the age-old enigmas of existence. Over 300 years ago, the human mind discovered the machine code of reality: mathematics. By utilizing abstract thought systems, humans began to decode the workings of the cosmos. From this understanding, the current scientific paradigm emerged, ultimately discovering the gift of technology. Today, however, our island of knowledge is surrounded by ever longer shores of ignorance. Science appears to have hit a dead end when confronted with the nature of reality and consciousness. In this fascinating and accessible volume, James Glattfelder explores a radical paradigm shift uncovering the ontology of reality. It is found to be information-theoretic and participatory, yielding a computational and programmable universe.

This collection includes 2 bestselling ebooks from award-winning author Nabeel Qureshi. Answering Jihad From New York Times bestselling author and former Muslim Nabeel Qureshi comes this personal, challenging, and respectful answer to the many questions surrounding jihad, the rise of ISIS, and Islamic terrorism. Setting aside speculations and competing voices, what really is jihad? How are we to understand jihad in relation to our Muslim neighbors and friends? Why is there such a surge of Islamist terrorism in the world today, and how are we to respond? Seeking Allah, Finding Jesus In Seeking Allah, Finding Jesus, Nabeel Qureshi describes his dramatic journey from Islam to Christianity, complete with friendships, investigations, and supernatural dreams along the way. Providing an intimate window into a loving Muslim home, Qureshi shares how he developed a passion for Islam before discovering, almost against his will, evidence that Jesus rose from the

dead and claimed to be God. Unable to deny the arguments but not wanting to deny his family, Qureshi's inner turmoil will challenge Christians and Muslims alike.

Essays in East-West Philosophy

Intimately and without jargon, *How to Wake Up: A Buddhist-Inspired Guide to Navigating Joy and Sorrow* describes the path to peace amid all of life's ups and downs. Using step by step instructions, the author illustrates how to be fully present in the moment without clinging to joy or resisting sorrow. This opens the door to a kind of wellness that goes beyond circumstances. Actively engaging life as it is in this fashion holds the potential for awakening to a peace and well-being that are not dependent on whether a particular experience is joyful or sorrowful. This is a practical book, containing dozens of exercises and practices, all of which are illustrated with easy-to-relate to personal stories from the author's experience.

Law, Freedom and Story

A class-tested first edition focusing on core areas of rhetorical research, such as metaphor, narrative, visual persuasion, ideology, and politics, with the intent of acquainting undergraduate students with a broad, accessible understanding of ideas, analytic frames, and examples of human language use. This textbook is written as a springboard for more sophisticated study, and also strives to connect the material to "message-making" in communication-related professions
