Haynes offers the best coverage for cars, trucks, vans, SUVs and motorcycles on the market today. Each manual contains easy to follow step-by-step instructions linked to hundreds of photographs and illustrations. Included in every manual: troubleshooting section to help identify specific problems; tips that give valuable short cuts to make the job easier and eliminate the need for special tools; notes, cautions and warnings for the home mechanic; color spark plug diagnosis and an easy to use index.

Iceland Volcano

This book has been written to be a self help book so that the public in general can protect themselves from the worst effects of the next Icelandic volcanic eruptions. We have already seen in March and April of 2010 what a small volcanic eruption did when Eyjafjallajokull blew up and caused chaos over the skies of Europe and North America. This was the least harmful perhaps of all 18 -- 25 massive strato volcanoes some of which I believe could erupt in the next 5 years. Ones like Katla which are linked to EJ (short version of Eyjafjallajokull) are about 10 times bigger than EJ. Then there is Laki which erupted in 1783 and 1784 and caused a huge

cloud of yellow poison mustard gas to spread over Europe potentially killing about 1 million people and yet no one today knows about this volcano, this is one of the biggest killers the world has ever known possibly killing up to 6 million people worldwide due to its effects upon the Jet stream and Monsoon rains and yet only a handful of Nordic Volcanologists and scientists seem to know about it. My book will educate the public to the dangerous relationship between human civilizations and volcanic eruptions which have profoundly changed the way previous civilizations and historical eras progressed or collapsed as the case may be.

Work and learning in microenterprises in the car repair industries of four European Community (EC) countries were examined through 21 case studies of firms with 10 or fewer employees (6 firms in Ireland and 5 each in Greece, the Netherlands, and Spain). Structured interviews were conducted with each firm's owner and 60 motor vehicle mechanics at the 21 firms. Firms were not selected randomly; rather, they were selected because of their active use of training to adapt their staff to technological, economic, and organizational change. The sample included franchise and nonfranchise firms. All 21 microfirms studied were simultaneously pursuing growth strategies and the strategy of specialization in networks. Of the 60 mechanics interviewed, 43 had initial vocational education for the sector. Except for the apprentices, all 43 mechanics participated in continuing training during the previous 3 years. Of the 17 mechanics with no initial training for the sector, 10 (59%) had participated in continuing training and only 7 (41%) reported learning a great deal from that training. Many employees developed skills through incidental learning (including learning by solving problems individually or with colleagues, learning by regular rotation of tasks, and learning under the boss or an experienced worker). (Contains 23 tables/figures) (MN)
