Since its formation in 1932, Saudi Arabia has been ruled by two interdependent families. The Al Sa'uds control politics and the descendants of Ibn Abd al-Wahhab impose Wahhabism—a violent, fanatical perversion of the pluralistic Islam practiced by most Muslims. Stephen Schwartz argues that Wahhabism, vigorously exported with the help of Saudi oil money, is what incites Palestinian suicide bombers, Osama bin Laden, and other Islamic terrorists throughout the world. Schwartz reveals the hypocrisy of the Saudi regime, whose moderate facade conceals state-sponsored repression and terrorism. He also raises troubling questions about Wahhabi infiltration of America's Islamic community and about U.S. oil companies sanitizing Saudi Arabia's image for the West. This sharp analysis and eye-opening expose illuminates the background to the September 11th terrorist attacks and offers new approaches for U.S. policy toward its closest ally in the Middle East.

Compact Utility Tractors, or CUTs, are cute little cutters! As farming became more refined so did the needs of tractors. The answer was a smaller, more maneuverable and fuel-efficient tractor with a variety of implements and attachments. With this focus on special needs, attachments became available such as plows, disc harrows, mower decks, cultivators, spreaders, snowblowers, and more. They have become a necessary utility for farmers, orchards, small construction jobs, and landscaping/maintenance for estates, parks and golf courses. At the forefront of this evolution was the Farmall Cub and John Deere Model L. Then came the Japanese invasion; a new kind of tractor by companies such as Yanmar and Kubota. These four-wheel drive machines were rugged and tough and used a variety of hydraulically powered attachments. American companies like John Deere, International Harvester, and Massey Ferguson built their own their own four-wheel versions. Today's compact tractors, such as the Kubota BX series, Massey Ferguson's GC series, and the John Deere 3000, offer an even larger selection of implements for special purposes.

J. M. Adovasio has spent the last thirty years at the center of one of our most fiery scientific debates: Who were the first humans in the Americas, and how and when did they get there? At its heart, *The First Americans* is the story of the revolution in thinking that Adovasio and his fellow archaeologists have brought about, and the firestorm it has ignited. As he writes, "The work of lifetimes has been put at risk, reputations have been damaged, an astounding amount of silliness and even profound stupidity has been taken as serious thought, and always lurking in the background of all the argumentation and gnashing of tenets has been the question of whether the field of archaeology can ever be pursued as a science."

The Kovel's Antiques & Collectibles Price List

Wall Street's miasmal garbage washes up on the Jersey Shore when a small time broker falls in love: Is he attracted to the beautiful lady — or her brother's inside information? Held spellbound by a steamy, auburn-haired woman with a dubious past and a get-rich-quick, insider trading scheme, Austin Carr knocks down a beehive of bad-acting Bonacellis, including the ill-tempered "Mr. Vic" Bonacelli, who wants his redhead back, and local mob lieutenant Angelina "Mama Bones" Bonacelli, architect of a strange and excruciating death trap for the fast-talking stockbroker she calls smarty pants. To survive, Austin must unravel threads of jealousy, revenge and new affections, discover the fate of a pseudo ruby called the Big Mojo and slam the lid on a pending United States of America vs. Austin Carr insider trading case. Can Austin and his Jersey Shore mouthpiece possibly out maneuver the savvy U.S. District Attorney from Manhattan? Will anything matter for Austin ever again if Mama Bones flips that switch? Praise for BIG MOJO ... "Darkly comic and always entertaining — with an outrageous cast of characters including a scheming grandmother and a mysterious redhead. Our engaging hero, fueled by honor and passion, does the best he can in a world where the bad guys seem determined to do him in. Gordon Gekko meets Janet Evanovich in this wry and winning caper — Jack Getze does it again!" — Hank Phillippi Ryan, Agatha, Anthony and Mary Higgins Clark Award winning author of Truth Be Told "If Jack Getze's Austin Carr novels aren't on your must-read list, you don't know what you're missing. Austin Carr's that buddy your wife doesn't like you to hang out with. Fast-talking, wisecracking, and hard-living, he's the type of guy who swears he's only ever looking for a good time, and yet every night out with him seems to end in a fight. But you can't deny he's got heart — and BIG MOJO is Carr's most epic adventure yet. It's got frame-ups. Insider trading. Stolen jewels. Double-crosses. Triple-crosses. Love potions. Gunplay. And enough outsized characters it could only take place in the great state of New Jersey. So pick it up. Give it a read. But maybe tell the missus you're hanging out with someone else." — Chris F. Holm, author of the Collector Series "There's no way you can lose with an Austin Carr novel with a gorgeous redhead, a character with the moniker of "Mama Bones", a double-crossing business partner, more bad guys than can be seen in one place outside of the White House, and Austin's smart mouth that surely he learned by reading lots of Robert B. Parker's character Spenser ... A truly rollicking, fun, action-filled read with more twists than a fevered revival of Hula Hoop fanatics at a Jersey Shore ballroom ... And then, there's that redhead. Always that redhead ... " — Les Edgerton, author of The Genuine, Imitation, Plastic Kidnapping and others "The irrepressible Austin Carr is back, and he's sly and sardonic as ever. Jack Getze's BIG MOJO is a rollercoaster ride you don't want to miss!" — Hilary Davidson, Anthony Award Winning Author of Blood Always Tells

String Methods for Beginners is designed for students to receive the essential playing and teaching skills on all orchestral string instruments. The goal of this textbook is to be truly methodical in its approach, and to assist the instructor,

completely eliminating the need to do additional research, or reorganization in preparation to teach this class. Students will gain the basic knowledge and experience to teach bowed stringed instruments in public schools. String Methods for Beginners covers the necessary topics to learn and teach the violin, viola, cello, and string bass. It explores the fundamentals of those instruments and teaching considerations, utilizing a heterogeneous approach. As the primary resource to any college- and university-level String Techniques, String Methods, or Instrumental Methods class, this course book fits into a standard semester, comprised of 25 lessons, which correspond with two hourly classes per week for the term. It provides the instructor with the tools to teach a classroom of non-majors or string education majors, or a mixed classroom of both. FEATURES Offers a blueprint for a semester long string methods course. For beginning students, and also comprehensive for more in-depth study or for reference. Logical, step-by-step "recipe-like" approach.

Ground-penetrating radar (GPR) has become one of the standard tools in the archaeologist's array of methods, but users still struggle to understand what the images tell us. In this book—illustrated with over 200 full-color photographs—Lawrence Conyers shows how results of geophysical surveys can test ideas regarding people, history, and cultures, as well as be used to prospect for buried remains. Using 20 years of data from more than 600 GPR surveys in a wide array of settings, Conyers, one of the first archaeological specialists in GPR, provides the consumer of GPR studies with basic information on how the process works. He show how the plots are generated, what subsurface factors influence specific profiles, how the archaeologist can help the surveyor collect optimal data, and how to translate the results into useable archaeological information.

This eye-opening, insightful exploration of Sufism, the spiritual tradition that has supported Islam for more than a thousand years, shows why it offers a promising foundation for reconciliation between the Western and Muslim worlds. Many Americans today identify Islam with maniacal hatred of the West. *The Other Islam* transforms this image and opens the way to finding common ground in our troubled times. Sufism, a blend of the mystical and rational tendencies within Islam, emerged soon after the revelation of Muhammad. A reforming movement against the increasing worldliness of Muslim society, it focuses on Islam's spiritual dimension. Described as "Islam of the Heart," Sufism has attracted adherents among both Sunni and Shi'a Muslims, as well as Jews, Christians, Hindus, and Buddhists. In *The Other Islam*, Stephen Schwartz traces the origins and history of Sufism, elucidates its teachings, and illustrates its links to the other religions. He comments on such celebrated Sufi poets and philosophers as Rumi and Al-Ghazali, and narrates their influence on the Kabbalah, on the descendants of the Jewish philosopher Maimonides, and on Christian mystics like Saint John of the Cross and Saint Teresa of Ávila as well as the American transcendentalists. Furthermore, Schwartz presents a fresh survey of Sufism in today's Islamic world, anticipating an intellectual renaissance of the faith and alternatives to fundamentalism and tyranny in Iraq, Saudi Arabia, Turkey, and Iran.

Java EE 7 First Look

Growing up near the Sabine, journalist Wes Ferguson, like most East Texans, steered clear of its murky, debris-filled waters, where alligators lived in the backwater sloughs and an occasional body was pulled from some out-of-the-way crossing. The Sabine held a reputation as a haunt for a handful of hunters and loggers, more than a few water moccasins, swarms of mosquitoes, and the occasional black bear lumbering through swamp oak and cypress knees. But when Ferguson set out to do a series of newspaper stories on the upper portion of the river, he and photographer Jacob Croft Botter were entranced by the river's subtle beauty and the solitude they found there. They came to admire the self-described "river rats" who hunted, fished, and swapped stories along the muddy water—plain folk who love the Sabine as much as Hill Country vacationers love the clear waters of the Guadalupe. Determined to travel the rest of the river, Ferguson and Botter loaded their gear and launched into the stretch of river that charts the line between the states and ends at the Gulf of Mexico.

The definitive book on steak has never been written-until now "Of all the meats, only one merits its own structure. There is no such place as a lamb house or a pork house, but even a small town can have a steak house." So begins Mark Schatzker's ultimate carnivorous quest. Fed up with one too many mediocre steaks, the intrepid journalist set out to track down, define, and eat the perfect specimen. His journey takes him to all the legendary sites of steak excellence-Texas, France, Scotland, Italy, Japan, Argentina, and Idaho's Pahsimeroi Valley-where he discovers the lunatic lengths steak lovers will go to consume the perfect cut. After contemplating the merits of Black Angus, Kobe, Chianina, and the prehistoric aurochs-a breed revived by the Nazis after four hundred years of extinction-Schatzker adopts his own heifer, fattens her on fruit, acorns, and Persian walnuts, and then grapples with ambivalence when this near-pet appears on his plate. Reminiscent of both Bill Bryson's and Bill Buford's writing, Steak is a warm, humorous, and wide-ranging read that introduces a wonderful new travel and food writer to the common table.

This volume explores the potential of employing a relational paradigm for the purposes of interdisciplinary exchange. Bringing together scholars from the social sciences, philosophy and theology, it seeks to bridge the gap between subject areas by focusing on real phenomena. Although these phenomena are studied by different disciplines, the editors demonstrate that it is also possible to study them from a common relational perspective that connects the different languages, theories and perspectives which characterize each discipline, by going beyond their differences to the core of reality itself. As an experimental collection that highlights the potential that exists for cross-disciplinary work, this volume will appeal to scholars across a range of field concerned with critical realist approaches to research, collaborative work across subjects and the manner in which disciplines can offer one another new insights.
