In Bethlehem Long Ago

You blunder into the grand opening of a new hospital, sign up to volunteer and, with considerable reluctance, let yourself be assigned to the ER. What starts as a Monday evening lark eventually becomes a life-changing experience. Your new

course leads from the ER to becoming a volunteer EMT and, later, a paramedic and a perennial night school student. Eventually, at an age when others might be thinking of retiring to play golf, you quit your job, move away from home, and go back to college as a physician assistant student with strangers less than half your age. This book details the often humorous experience that follows from a perspective that hopefully will help others follow their own paths, whatever they may be. Along the way, new experiences evoke old memories, while new friends, teachers, and patients teach important new lessons. The book comes full circle with a view of what it is like to be a PA, one of U.S. News & World Report's "50 hottest careers."

This much anticipated collection of stories, written by Oxford University Fellow and Pain Scientist, Dr GL Moseley, provides an entertaining and informative way to understand modern pain biology. Described by critics as 'a gem' and by clinicians as 'entertaining and educative', Painful Yarns is a unique book. The stories, some of his travels in outback Australia, some of experiences growing up, are great yarns. At the end of each story, there is a section "so what has this got to do with pain?" in which Lorimer uses the story as a metaphor for some aspect of pain biology. The level of the pain education is appropriate for patients and health professionals. The entertainment is good for everyone. You don't have to be interested in pain to get something from this book and a laugh or two!

Grant Management: Funding for Public and Nonprofit Programs

“A poignant expression of the durability, grace, and potential of the human spirit” set in a post-nuclear dystopia where words are worth killing for (Jean M. Auel, author of the Earth’s Children series). By the late twenty-first century, civilization has nearly been destroyed by overpopulation, economic chaos, horrific disease, and a global war that brought a devastating nuclear winter. On the Oregon coast, two women—writer Mary Hope and painter Rachel Morrow—embark on an audacious project to help save future generations: the preservation of books, both their own and any they can find at nearby abandoned houses. For years, they labor in solitude. Then they encounter a young man who comes from a group of survivors in the South. They call their community the Ark. Rachel and Mary see the possibility of civilization rising again. But they realize with trepidation that the Arkites believe in only one book—the Judeo-Christian bible—and regard all other books as blasphemous. And those who go against the word of God must be cleansed from the Earth . . . In this “thought-provoking” novel of humanity, hope, and horror, M.K. Wren displays “her passionate concern with what gives life meaning (Library Journal).

Geddes describes the life of the Land Dayaks--their traditions, beliefs, and their attitudes toward things around them--and reveals not only their differences from, but also their similarities to the greater world of humanity outside their community.
