A Royal Heritage

As an infant, James Clyde was deposited at a children's home by his wounded, blood-soaked grandfather. As a result, he grows up under a cloud of mystery. Eleven years later when he hears about his strange past, he vows to uncover the truth. But before he can, his grandfather hands him a magical and mysterious diamond of Orchestra. With the aid of his friends, Ben and Mary Forester, James must protect the diamond from evil forces. Soon, however, their lives are in grave danger. They are being hunted by a sinister man dressed in black and his blood-thirsty army. Outnumbered, James finds he must use the power of the diamond to escape their clutches - or become another victim of their murderous quest. So begins a journey that will transport them to an alternative world where they must confront the mysterious man in black for a final, winner-takes-all battle... James Clyde and the Diamonds of Orchestra will appeal to children aged 12-15 that are fans of fantasy fiction. Colm is inspired by a number of authors, including J. K. Rowling, C. S. Lewis, Brian Keaney and Charles Dickens.James Clyde and the Diamonds of Orchestra won the Bronze award in the 9-12 year-old category of the Wishing Shelf Independent Book Awards 2012.

Katie Boyle has known Aiden Murphy her whole life. Everyone expects them to marry someday, but as much as she cares for her lifelong friend, Katie wants more from life. She craves adventure and excitement, and doesn't want to give in to the obvious choice. Heading west along the Oregon Trail is, in her mind, the beginning of the new life she has always wanted, and she intends to embrace it. But when she is abducted by a Cheyenne brave and taken to his village, she is in for more adventure than she bargained for. Aiden has loved Katie for as long as he has known her, and is determined to win her, regardless of her protests. He has watched over her as she spread her wings without her ever knowing it. But his devotion is put to the test when Katie is taken. He risks everything to follow her and rescue her, only to end up as the center of attention in the Cheyenne village. His skill with music makes him an honored guest amongst the Indians, but can he save Katie before her fate is sealed forever? Sometimes the man of your dreams is the man who has been there all along. Constitution of the State of Michigan

In 1968, British Leyland brought together many of Britain's motor manufacturers, with the intention of creating a robust unified group that could equal the strength of the big European conglomerates. But this was not to be. There have been many

books about the politics and the business activities of British Leyland, but British Leyland - The Cars, 1968-1986 looks exclusively at the cars that came from the company, both the models it inherited and those it created. The eighteen years of the corporation's existence saw a confusing multitude of different car types, but this book resolves these confusions, clarifying who built what, and when. The book takes 1986 as its cut-off point because this was the year that the old British Leyland ceased to exist and what was left of the car and light commercial business was renamed the Rover Group. The book includes: Production histories and technical specifications of every major model; The special overseas models; Appendices on engines, code names, and factories; Buying guidance on the models built in Britain. This is the most comprehensive book so far to focus on the cars from British Leyland between 1968-1986 and it provides an overview of each model's production history, together with essential specification details. It is profusely illustrated with 178 colour and 63 b&w photographs.

Bridal Bargains: 11th Edition. American's #1 Best-Selling Wedding Book

It is an age of hurry and worry. Fortunes are quickly made and freely spent. Nearly all busy, hard-worked Americans have an intuitive sense of the need that exists for at least one period of rest and relaxation during each year, and all—or nearly all—are willing to pay liberally, too liberally in fact, for anything that conduces to rest, recreation and sport. I am sorry to say that we mostly get swindled. To the man of millions it makes little difference. I do not write for him, and can do him little good. But there are hundreds of thousands of practical, useful men, many of them far from being rich; mechanics, artists, writers, merchants, clerks, business men—workers, so to speak—who sorely need and well deserve a season of rest and relaxation at least once a year. To these, and for these, I write. (George Washington Sears, Chapter I)

Derek Bell's name became inextricably linked with that of Porsche during his long and hugely successful career as a racing driver. In this new 276-page book, Bell collaborates with renowned motorsport author Richard Heseltine to give the reader a very personal insight into his experiences racing for the legendary German

marque. The approach taken by this latest publication from Porter Press International is to look at every race Bell drove for Porsche, in detail and with revealing comments from the book's subject. Light is cast on Bell's most prestigious victories with Porsche - four of his five in the Le Mans 24 Hours, three in the Daytona 24 Hours, two in the World Sportscar Championship - and many more besides. Bell describes the Porsches he raced, from the fearsome 917 to the iconic 956, 962, and 911. And he shares his thoughts on the now-legendary drivers he raced with, including six-time Le Mans winner Jacky Ickx, the famously flamboyant Hans Stuck, and two immense talents who lost their lives to the sport, Jo Siffert and Stefan Bellof. The overall effect is a fascinating trip back in time to a golden era for Porsche and sports car racing as a whole.

The House on the Gulf

[If only] Bran would stop acting weird. Probably he had a perfectly reasonable explanation for everything. I just couldn't imagine what it would be. When Britt's older brother, Bran, lands a summer job house-sitting for the Marquises, an elderly couple, it seems like a great opportunity. Britt and Bran have moved to Florida so their mother can finish college, and the house-sitting income will allow their mom to quit her job and take classes full-time. Having never lived in a real house before, Britt is thrilled. There's only one problem: Britt starts to suspect her family isn't supposed to be there. She's been noticing that Bran is acting weird and defensive -- he hides the Marquises' mail, won't let anyone touch the thermostat, and discourages Britt from meeting any of the neighbors. Determined to get to the bottom of things, Britt starts investigating and makes a startling discovery -- the Marquises aren't who Bran has led her and their mom to believe. So whose house are they staying in, and why has Bran brought them there? With unexpected twists and turns, award winner Margaret Peterson Haddix has again crafted a thriller that will grip readers until its stunning conclusion.

Trail of Dreams

Fifteen years in the making, a landmark reinterpretation of the life of a pivotal figure in British and European history. In this magisterial addition to the Yale English Monarchs series, David Bates combines biography and a multidisciplinary approach to examine the life of a major figure in British and European history. Using a framework derived from studies of early medieval kingship, he assesses each phase of William's life to establish why so many trusted William to invade England in 1066 and the consequences of this on the history of the so-called Norman Conquest after the Battle of Hastings and for generations to come. A leading historian of the period, Bates is notable for having worked extensively in the archives of northern France and discovered many eleventh- and twelfth-century charters largely unnoticed by English-language scholars. Taking an innovative approach, he argues for a move away from old perceptions and controversies associated with William's life and the Norman Conquest. This deeply researched volume is the scholarly biography for our generation.

James Clyde and the Diamonds of Orchestra

Through the eyes of an inventor of new markets, *Good Derivatives: A Story of Financial and Environmental Innovation* tells the story of how financial innovation – a concept that is misunderstood and under attack – has been a positive force in the last four decades. If properly designed and regulated, these “good derivatives” can open vast possibilities to address a variety of global problems. Filled with provocative ideas, fascinating stories, and valuable lessons, it will provide both an insightful interpretation of the last forty years in capital and environmental markets and a vision of world finance for the next forty years. As a young economist at the Chicago Board of Trade, Richard Sandor helped create interest rate futures, a development that revolutionized worldwide finance. Later, he pioneered the use of emissions trading to reduce acid rain, one of the most successful environmental programs ever. He will provide unique insights into the process of creating these new financial products. Covering successes and failures, the story describes the tireless process of inventing, educating and creating support for these new inventions in places like Chicago, New York, London, Paris and how it is unfolding today in Mumbai, Shanghai and Beijing. The book will tell the story of the creation of the Chicago Climate Exchange and its affiliated exchanges (European Climate Exchange, Chicago Climate Futures Exchange and Tianjin Climate Exchange, located in China). The lessons learned in these markets

can play a critical role in effectively addressing global climate change and other pressing environmental issues. The author argues that market-based trading systems are a far more effective means of reducing pollutants than “command-and-control”. Environmental markets may ultimately help to find solutions to issues such as rainforest destruction, water problems and biodiversity threats. Written in an engaging, narrative style, Good Derivatives will be of interest to both practitioners and general readers who want to better understand the creative process of financial innovation. In the middle of so much distrust of markets, it is also a recipe of how transparent, well-regulated markets can be a force for good in the environmental, health, and social areas.

Literary Nonfiction. California Interest. Women's Studies. Film. Memoir. THE BIG LOVE is a Hollywood nightmare. It tells the story of Errol Flynn--a fading, alcoholic movie star--and the underage dancer-actress Beverly Aadland. The narrator? Beverly Aadland's fame-worshiping mother Mrs. Florence Aadland, who spurs the relationship on. There is nothing subtle or sympathetic about this memoir: It is outrageous, grotesque, surreal, notorious--an intimate look at Hollywood exploitation and decay. On the one hand, THE BIG LOVE depicts the deterioration of Errol Flynn, an actor who is quickly losing relevance after years of playing irresistible swashbucklers in films such as Captain Blood (1935) and The Adventures of Robin Hood (1938). He is riddled with medical problems, drinking himself to death. On the other hand, there is Mrs. Florence Aadland, also an alcoholic, an uncultured stage mother psychotically pushing her daughter Beverly forward even at the cost of her own marriage. A bizarre, seedy time capsule of the 1950s, THE BIG LOVE is the long-lost literary sister of Barbara Payton's I AM NOT ASHAMED. And, after languishing out of print for years, it is ready to shock brand new audiences with its absurd humor, villainous characters, and sickly dissipation.

The Linear Autoland Simulink model was created to be a modular test environment for testing of control system components in commercial aircraft. The input variables, physical laws, and referenced frames used are summarized. The state space theory underlying the model is surveyed and the location of the control actuators described. The equations used to realize the Dryden gust model to simulate winds and gusts are derived. A description of the pseudo-random number generation method used in the wind gust model is included. The longitudinal autopilot, lateral autopilot, automatic throttle autopilot, engine model and automatic trim devices are considered as subsystems. The experience in converting the Airlabs FORTRAN aircraft control system simulation to a graphical simulation tool (Matlab/Simulink) is described.
