When you're out riding, things happen. If you keep at it, everything happens. Thus goes the simple wisdom of Foster Kinn in Freedom's Rush: Tales from a Biker and His Beast. Join Foster as he travels through the continental United States with an

occasional detour into Canada, experience with him all that can happen in the "day in a life" of a biker: "Sometimes you're hungry, sometimes you eat too much. Sometimes you're unbearably hot, sometimes painfully cold. You lose things and get lost; you find things and find your way. You fall in love, you find things to despise. You bleed and you heal; you get sick, then you're invincible. The rains pelt, the snows blind, the winds make you helpless. You ride through gorgeous scenery and through desolate wastelands; all places are the way they're supposed to be and they're all perfect. It's life in microcosm." In part a celebration of the grandness of this wide, wonderful world, in part a meditation on the meaning of freedom and our sacred right to create, you will laugh with Kinn at all the wonderfully wacky characters he meets on the road, and you will be dazzled by the utter joy he finds as he rides. When you read the last line, you will know what he means when he writes: As long as freedoms exist, we will ride; As long as we ride, freedoms will exist.

Motorcycle: The Definitive Visual History

Experience one of the first novels from New York Times bestselling author Ted Dekker. "[Heaven's Wager is] genuinely exciting . . . fast paced . . . spine-tingling . . ." —Publishers Weekly A thriller unlike any you have ever read. A love strong enough to bring a tremor to your bones. A sacrifice powerful enough to make heaven weep. At the close of World War II, a shell-shocked soldier, Jan Jovic, was forced to inflict a game of life and death on a peaceful Bosnian community. In a few short hours, this young man was confronted by more love—and hate—than most experience in a lifetime. Years later, Jan has become a world-renown writer with widespread influence in the United States, his past buried deep in his memory. Until

the most inopportune time, the game Jan witnessed comes back to haunt him . . . and unwittingly leads him to a beautiful but broken woman caught in an underworld of crime. He must now defeat an evil rarely seen. But there is a price. One that even this war-scarred soldier can't imagine. "Well, well, guess what I've found. A fiction writer with a rare knack for a compelling story, an expansive reservoir of clever ideas, and a unique dry wit that makes me laugh." —Frank Peretti, New York Times bestselling author "Rarely does a novel grip a reader's heart and soul the way Heaven's Wager does. Dekker is among a very small number of writers who have mastered the challenge of blending sound theology with knock-your-socks-off storytelling." —Robert Liparulo, novelist and contributing editor of New Man magazine

Amidst rumors that the Paris opera house is haunted, Christine Daaé, a young Swedish girl, performs at a gala and attracts attention from both her childhood sweetheart, Raoul, and the Phantom, who is living underground. Suddenly, mysterious circumstances abound at the opera house: a stagehand is found dead, managers receive letters demanding that Christine sing the lead role, and a chandelier crashes down into the audience. When Christine reunites with Raoul, the phantom grows dangerously jealous. Will Christine stay on the stage or disappear into the opera house's dark cellars and grim secrets? Gaston Leroux's Gothic novel was first published in French in 1911. This is an unabridged version of the translation by Alexander Teixeira de Mattos, published the same year.

Auto Repair For Dummies, 2nd Edition (9781119543619) was previously published as Auto Repair For Dummies, 2nd Edition (9780764599026). While this version features a new Dummies cover and design, the content is the same as the prior release and should not be considered a new or updated product. The top-selling auto repair guide--400,000 copies sold--now extensively reorganized and updated Forty-eight percent of U.S. households perform at least some automobile maintenance on their own, with women now accounting for one third of this \$34 billion automotive do-it-yourself market. For new or would-be do-it-yourself mechanics, this illustrated how-to guide has long been a must and now it's even better. A complete reorganization now puts relevant repair and maintenance information directly after each automotive system overview, making it much easier to find hands-on fix-it instructions. Author Deanna Sclar has updated systems and repair information throughout, eliminating discussions of carburetors and adding coverage of hybrid and alternative fuel vehicles. She's also revised schedules for tune-ups and oil changes, included driving tips that can save on maintenance and repair costs, and added new advice on troubleshooting problems and determining when to call in a professional mechanic. For anyone who wants to save money on car repairs and maintenance, this book is the place to start. Deanna Sclar (Long Beach, CA), an acclaimed auto repair expert and consumer advocate, has contributed to the Los Angeles Times and has been interviewed on the Today show, NBC Nightly News, and other television programs.

Suspension is probably the most misunderstood aspect of motorcycle performance. This book, by America's premier suspension specialist, makes the art and science of suspension tuning accessible to professional and backyard motorcycle

mechanics alike. Based on Paul Thede's wildly popular Race Tech Suspension Seminars, this step-by-step guide shows anyone how to make their bike, or their kid's, handle like a pro's. Thede gives a clear account of the three forces of suspension that you must understand to make accurate assessments of your suspension's condition. He outlines testing procedures that will help you gauge how well you're improving your suspension, along with your riding. And, if you're inclined to perfect your bike's handling, he even explains the black art of chassis geometry. Finally, step-by-step photos of suspension disassembly and assembly help you rebuild your forks and shocks for optimum performance. The book even provides detailed troubleshooting guides for dirt, street, and supermoto--promising a solution to virtually any handling problem.

From the publishers of Motorcycle Consumer News, *Shifting Gears at 50* is a one-of-a-kind motorcycling manual for returning and late-entry riders, essentially anyone 40 years old and up who's looking to hit the road on two wheels. Author Philip Buonpastore, a motorcycle journalist and retired US Air Force photographer, helps readers gear up to get back on a motorcycle (or get on one for the first time). In Part 1, "Becoming a Motorcyclist," Buonpastore discusses the basics of buying the right bike, gear, and equipment and getting the bike up to speed. The book continues with a good overview of learning to ride, the importance of taking a road course, venturing out on the first ride, and extending rides to long-distance jaunts. Throughout Part 1 are sidebars by riding- safety instructor and expert Walt Fulton, offering sound advice on safety precautions and execution for every leg of the new and returning rider's journey. The author emphasizes what older riders should be aware of and which factors can affect their rides. Adding lots of great firsthand advice are humorous and helpful stories collected by the author and related by returning riders at various ages, from their late 30s to 60s. In Part 2, Buonpastore shares five of his favorite travelogues covering his long-distance tours around the US, from the American South to the west coasts. This section is illustrated by over 100 of the author's breathtaking photographs of the various locations he toured on his bike. The foreword to the book is provided by best-selling motorcycle author David Hough (author of I-5 Press's *Proficient Motorcycling* and *Mastering the Ride*). Hough writes, "If you're getting into today's motorcycling at an age your doctor would describe as 'middle aged' or 'senior,' do you yourself a clever favor and read Phil's book."

Pictorial History of Japanese Motorcycles

This best-selling book is also "#1 book in motorcycle safety" (Nielsen BookScan) and essential reading for all motorcyclists regardless of their years of experience. Author David L. Hough, a revered motorcycle author, columnist, and riding-safety consultant, lays out a clear course for all riders who want to sharpen their handling skills and improve their rides. This second edition, expanded and now in full color, offers new riders and road warriors the exact kind of advice they need to be prepared for anything when on the road, how to avoid accidents, and how to handle the unexpected. Hough, who began

motorcycling in the 1960s, tackles every imaginable topic—from the mechanics of the bike, selection of the right-sized bike, and basic riding skills to night riding, group outings, and advanced survival tactics. In the chapter called “Motorcycle Dynamics,” Hough spells out the equipment needed and basic skills required to control a bike, and specifically keeping the rider’s safety and ability to avoid potentially injurious or fatal crashes. The author is outspoken and direct when it comes to safety, and he emphasizes the importance of the rider’s braking abilities and spells out how to improve them. The chapter offers six tried-and-true techniques for quick-stop tactics, critical for every rider to understand and master. He also addresses other vital skills that riders need to evaluate and improve, such as turning, maintaining balance and stability, and steering. He defines, compares, and analyzes the ins and outs of steering and control: direct steering, countersteering, push steering, out-tracking, coning, u-turns, and directional control. The chapter called “Cornering Habits” is a virtual master class in acceleration, deceleration, use of weight, throttle, leaning, and handling challenging terrain. Hough’s skill as a photographer and illustrator adds a graphic element to his books that leads to immediate understanding of the concepts he explains. The detail offered in each section of the book can only come from decades on the road, and the author is the consummate instructor, assigning homework to the readers in the form of exercises to practice and improve specific techniques that he outlines and illustrates in the text. Any rider who would venture out on the road without David Hough’s voice in his head takes an unnecessary risk with his own life. Proficient Motorcycling takes riders from long, snaking country roads right into the traffic of the big city, and Hough offers the best advice for riders dealing with the most challenging conditions, whether it’s road construction, snap-jawed intersections, skateboarders, or suddenly slippery road surfaces. A critical section of the book offers riders advice on how to deal with automobiles, including aggressive car drivers, oblivious SUV drivers, or “blind” truck drivers. The book offers the kind of first-hand experience that can literally save riders’ lives, as illustrated in the chapters “Booby Traps” and “Special Situations,” which offer evasive tactics and advice to avoid and handle everything from slick surfaces, curbs, and construction plates to ferocious dogs, hazardous wildlife, and difficult weather conditions. The final chapter of the book, “Sharing the Ride,” is geared toward experienced riders who travel together in groups or who travel with a second passenger on the bike. Topics covered are formation, packing for trips, communication between riders, sidecars, trikes, and more. The book concludes with a resources section of organizations, training schools, educational tools, and websites; a glossary of 80+ terms; and a complete index.
