Caldecott Honor artist Faith Ringgold takes readers on an unforgettable journey through the Harlem Renaissance when Lonnie and his uncle Bates go back to Harlem in the 1920s. Along the way, they meet famous writers, musicians, artists, and athletes, from Langston Hughes and W.E.B. Du Bois to Josephine Baker and Zora Neale Hurston and many more, who created this incredible period. And after an exciting day of walking with giants, Lonnie fully understands why the Harlem Renaissance is so important. Faith Ringgold's bold and vibrant illustrations capture the song and dance of the Harlem Renaissance while her story will captivate young readers, teaching them all about this significant time in our history. A glossary and further reading list are included in the back of the book, making this perfect for Common Core.

This book provides the readers with a timely guide to the application of biomimetic principles in architecture and engineering design. As a result of a combined effort by two internationally recognized authorities, the biologist Werner Nachtigall and the architect Göran Pohl, the book describes the principles which can be used to compare nature and technology, and at the same time it presents detailed explanations and examples showing how biology can be used as a source of inspiration and “translated” in building and architectural solutions (biomimicry). Even though nature cannot be directly copied, the living world can provide architects and engineers with a wealth of analogues and inspirations for their own creative designs. But how can analysis of natural entities give rise to advanced and sustainable design? By reporting on the latest bionic design methods and using extensive artwork, the book guides readers through the field of nature-

inspired architecture, offering an extraordinary resource for professional architects, engineers, designers and urban planners, as well as for university teachers, researchers and students. Natural evolution is seen throughout the book as a powerful resource that can serve architecture and design by providing innovative, optimal and sustainable solutions.

PRIX GONCOURT-WINNING AUTHOR By the celebrated Oulipo writer, this brilliant and witty novel set in Lisbon explores love, relationships, and the strange balance between literature and life. Journalist, writer, and translator Vincent Balmer moves to Lisbon to escape from a failing affair. During his first assignment there, he teams up with Antonio—a photographer who has

just returned to the city after a ten-year absence—to report for a French newspaper on an infamous serial killer’s trial. While walking around the city together to take notes and photos for the article, they visit the places of Antonio’s childhood, swap stories from their pasts, and confide in each other. But the more they learn about each other, the more their lives become inextricably intertwined. With a structure that parallels Homer’s *Odyssey*, *Eléctrico W* recounts their nine days together and the adventures that proliferate to form a constellation of successive ephemeral connections and relationships.

Alan Titchmarsh's hit TV primetime show *Love Your Garden* will be back for a second series in June 2012, and this is the first official tie-in. Much-loved broadcaster and bestselling author Alan Titchmarsh has returned to his gardening roots as presenter of ITV1's *Love Your Garden*. In this hugely popular show, Alan visits some of Britain's most beautiful domestic gardens, and shows us how to recreate the look ourselves, with minimum fuss. On each visit, he also helps out with any problem areas, and suggest ways to improve the design, while his team of co-presenters, Matt James, Valentine Warner, Charlotte Uhlenbrouk and Laetitia Maklouf, are on hand with advice on design, growing your own food, wildlife and craft. In this essential accompanying book, Alan looks back on all twelve gardens from the first series, which span across a wide variety of styles from a cottage garden, a country garden and a city garden through to a seaside garden and a formal garden. He takes us through the practical projects, step by step -- showing us how to build a pond or create a wildlife area -- and includes the ideas offered by his co-presenters. Alan also explores each theme in greater depth, with extra hints and tips, providing a stand-alone practical handbook to be enjoyed by gardeners of all levels, and anybody who wants to explore the joys of outdoor living.

"From Park Avenue apartments to Maine country houses to Bahamian seaside cottages, leading interior designer Tom Scheerer creates rooms that are crisp, confident, and visually enthralling. He combines classic, old-fashioned decorating with modernist touches, simple, natural materials, beckoning palettes, and vernacular crafts. The result, as seen on every page of this first book of his work, is an object lesson in highly sophisticated, yet relaxed, unpretentious décor. "--

## **Dork Diaries Books 10-12**

Almost everyone enjoys a good scare now and then, especially kids. In recent years, much of the 'scary' stuff that's out there relies on blood and a bucketful of guts to gross out the reader, viewer or listener. These stories should be a welcome break from those kinds of scares, relying more on imagination and creepiness rather than gore, at least that was the intent when I sat down to write these. A word of caution, some children may not be up to some of the tales contained within-if in doubt give these stories a quick skim before reading them aloud around a campfire or at a sleepover. Of course feel free to change endings or omit parts you think may be disturbing to the little listeners. In that light, the last story might be the one to end with if you want them to get to sleep on time, as it's a bit silly and has a funny ending-at least it was funny when I first heard my uncle tell it to me when I was a little kid, and I guess it still kind of is, so I guess I haven't grown up that

much. Other than the final tale which is loosely based on an old story many may have heard in some form, and which was passed down the generations from my family, these stories are all my original creations, gathered from ideas and nightmares I remember being scared of when I was a child, and some, I must admit, still scare me to this day. Remember, there's no shame in sleeping with a nightlight, or in letting the batteries drain on your flashlight when you leave it on all night next to your sleeping bag within easy grasp. After all, it can't do any harm, and no one else has to know

"Inside these pages, you will find step-by-step instructions for a mobile broiler chicken shelter for pastured poultry that is used by farmers and homesteaders all over the country. Raising chickens on grass provides them with a healthy lifestyle and a delicious flavor. You can raise just enough of them to feed your family or scale up to include pastured poultry as a profitable part of your farm business. John Suscovich has raised thousands of chickens using these mobile shelters, a main enterprise on his farm in Connecticut. These chicken tractors were created using the best elements from other designs. They are easy to move and provide a good life for the chickens. With a little bit of creativity, they can also be modified for seasonal egg-layer housing, rabbits, ducks and forts for your kids. Not only does this book contain the plans and supply list to build your first chicken tractor, but it gives you some insight into how to use it and what mindset you should have if you are to become a happy and successful farmer. John also walks you through the light carpentry skills you need to build these

chicken tractors and teaches you the most commonly used knots on a farm. You may learn these skills for this project, but you'll be able to apply them on your farm for years to come."--Page [4] of cover.

### **Always Eat After 7 PM**

This book is the first study of the portico and its decorative program as a cultural phenomenon in Renaissance Italy. Focusing on a largely neglected group of porticoes decorated with painted pergolas that appeared in Rome and environs in the sixteenth and early seventeenth centuries, it tells the story of how an element of the garden—the pergola—became a pictorial topos in portico decoration, and evolved, hand in hand with its real cousin in the garden, into an object for cultural emulation among the educated patrons of early modern Rome. The liminality of both the portico and the pergola at the interface of architecture and garden is key to the interpretation of these architectural and painted forms, which rests on the intersecting frameworks of the classical tradition, natural history, and the cultural identity of the aristocracy. In the mediating space of the Renaissance portico, the illusionism pergola created an art gallery, a natural history museum, and a virtual garden where one could engage in leisurely strolls, learned conversations, appreciation of art, and scientific investigation, as well as extensive travel across time and space. The book proposes the interpretation that the illusionistic pergola was an artistic formula for the early modern perception of nature.
