The periscope is the eye of the submarine. It allows observation of the sea and the sky above, while the submarine remains submerged. It is also a crucial piece of combat equipment, featuring a stadimeter to estimate the range and course angle of a target. Originally printed by the U.S. Navy, this Periscope Manual explains the operation and design of the periscope, and includes descriptions of its complex optical and mechanical details. It also contains maintenance and repair information. It's a wonderful reference for anyone interested in the science of optics, for the modeler or museum docent, or anyone who ever wondered, "How the heck does that work?"

The Health Insurance Study is a social experiment investigating the effects of different health care financing arrangements

(differing coinsurance rates and deductibles, and fee-for-service practice versus prepaid group practice) on the use of medical services, individual health status, satisfaction with care, and quality of care. This report describes the medical screening examination administered to a random sample of HIS participants at enrollment in the study and to all participants at exit from the study. A medical history questionnaire was also completed by all enrollees. Criteria for screening test selection and administration are discussed, and technical descriptions of screening examination test procedures given.
