Policy and Political Theory in Trade Practice

Built on the theme “history, culture and international law”, this special course gives a comprehensive review of China’s contemporary perspective and practice of international law in the past 60 years, with its focus on the recent 30 years when China is gradually integrated into international legal system through its opening up and economic reform process.

Thinking with Cases

The assembled articles in The History and Theory of Legal Practice in China illustrate a new “historical-social jurisprudence,” and explore the possible conceptual underpinnings of a modern Chinese legal system that would both accommodate and integrate the unavoidable paradoxes of contemporary China.

Fundamentals of Complementary and Alternative Medicine - E-Book

Case studies fascinate because they link individual instances to general patterns and knowledge to action without denying the priority of individual situations over the generalizations derived from them. In this volume, an international group of senior scholars comes together to consider the use of cases to

Online Library Practice And Cases Of China Maritime Law

produce empirical knowledge in premodern China. They trace the process by which the project of thinking with cases acquired a systematic and public character in the ninth century CE and after. Premodern Chinese experts on medicine and law circulated printed case collections to demonstrate efficacy or claim validity for their judgments. They were joined by authors of religious and philosophical texts. The rhetorical strategies and forms of argument used by all of these writers were allied with historical narratives, exemplary biographies, and case examples composed as aids to imperial statecraft. The innovative and productive explorations gathered here present a coherent set of interlocking arguments that will be of interest to comparativists as well as specialists on premodern East Asia. For China scholars, they examine the interaction of different fields of learning in the late imperial period, the relationship of evidential reasoning and literary forms, and the philosophical frameworks that linked knowledge to experience and action. For comparativists, the essays bring China into a global conversation about the methodologies of the human sciences. Code, Custom, and Legal Practice in China

Focusing on the dichotomous and comparative analysis of the legitimacy, paradigm, and operating frames of bank governance and its reproduction in the new financial regime following the global financial crisis, this book examines in depth how corporate governance in bank institutions is legitimized, justified, and delivered in diversified financial models and their influences on the Chinese banking industry. By combining this type of financial model analysis with the new institutionalism theory, the book lifts the mysterious veil from corporate governance in Chinese banking institutions with regard to its establishment and constant changes. Through a kaleidoscope lens and by conducting a “layer by layer” diagnosis, the book tells the “background stories” of the complex settings for Chinese financial institutions, asks and answers the paradigmatic question of for whom banks are actually run and governed, and mind-maps the main corporate governance mechanisms and practices prevalent in Chinese banks.

Corporate Income Tax Law and Practice in the People's Republic of China provides a comprehensive analysis of China's corporate income tax law. A new corporate income tax law came into effect on January 1, 2008. The new law unified the two corporate income tax systems that were applicable to domestic enterprises, foreign enterprises and foreign invested enterprises, respectively. A large portion of this book summarizes the new tax law, the implementation rules of the law, and the interpretation circulars issued by the Chinese tax authorities. The mapping of sections of tax law, regulations, and circulars into the applicable areas of business transactions and operations is helpful to lawyers, accountants, and other professionals. Detailed citations allow readers to find the authorities at their original sources. Also included is some introductory and historical information for those who seek a general knowledge of China tax law. One chapter is devoted to addressing major areas of tax treaties and agreements between China and other countries or regions. Tables summarizing the treaties with regards to permanent establishment, dividends, interest, royalties, and capital gains provide readers with a quick reference and an efficient means for comparative analysis. The issues of administration and enforcement of specific tax rules are discussed in various chapters. Separate chapters cover tax compliance and tax audit and appeals. In addition, the book comments on various tax rules and offers a view of possible tax treatments in areas that have not been

addressed or clearly addressed by the law, regulations and other authorities.

As such, it provides many valuable insights." Chinese Contemporary Perspectives on International Law

This is the third volume in the series "Yearbook Law & Legal Practice" "in East Asia," which addresses the legal systems of this important region and provides an insight into some of the most topical issues in East Asian law and practice. The overall focus of the series is on the legal aspects of doing business in East Asia, although legal issues of a more general nature may also be included where these are relevant for a better understanding of the particular legal culture concerned. Traditional East Asian healthcare systems have moved rapidly from the fringes of healthcare systems in the West towards the centre over the past 50 years. This change of status for traditional medicines presents their practitioners with both opportunities and challenges as the focus shifts from one of opposition towards one of integration into biomedically dominated healthcare systems. Integrating East Asian Medicine into Contemporary Healthcare examines the opportunities and challenges of integrating East Asian medicine into Western healthcare systems from an interdisciplinary perspective. Volker Scheid and Hugh MacPherson bring together contributions from acknowledged

experts from a number of different disciplines - including clinical researchers, Chinese Medicine practitioners, historians, medical anthropologists, experts in the social studies of science, technology and medicine - to examine and debate the impact of the evidence-based medicine movement on the ongoing modernization of East Asian medicines. The book considers the following questions: •What are the values, goals and ethics implicit within traditional East Asian medical practices? • What claims to effectiveness and safety are made by East Asian medical practices? •What is at stake in subjecting these medical practices to biomedical models of evaluation? • What constitutes best practice? How is it to be defined and measured? • What are the ideologies and politics behind the process of integration of East Asian medical practices into modern health care systems? • What can we learn from a variety of models of integration into contemporary healthcare?

Leisure and Power in Urban China is the first comprehensive study of leisure activities in a medium size Chinese city. Hitherto, studies of Chinese leisure have focused on holidays, festivals and tourism. This, however, is a study of the kinds of leisure that take place on regular workdays in a local environment of

Quanzhou city. In doing so, Leisure and Power introduces leisure studies to China studies, and data from China to the field of Leisure studies. Based on interviews with people from all walks of life and case studies from bookshops, internet bars, Karaoke parlours, streets and public squares, Rolandsen brings to attention the importance of fun and socializing in the lives of Chinese urbanites. Central to the study is the contrast between popular practices and official discourse. Rolandsen provides in-depth analyses of the moralist "PRC leisure ethic" so characteristic of official Chinese publications and news media. Using examples from everyday life as a contrast, this study demonstrates that official propaganda has but little influence on how Chinese individuals lead their lives. Taking leisure as a point of departure, this book describes the new kinds of interaction between the local party-state and the population it seeks to govern. This book will be of interest to students and scholars of Chinese Studies, Leisure Studies, Urban Studies and Asian Studies in general.

Anti-dumping Law and Practice of China

The China Anti-Monopoly Law (AML), which became effective August 1, 2008, is the first comprehensive competition law enacted by China. The AML prohibits a broad array of agreements between competitors and commercial counterparties, as well as competitive conduct by single firms that may harm the competitive process. In addition, it establishes a mandatory administrative review procedure for mergers and acquisitions between companies meeting certain sales thresholds, globally or in China. Beyond these fundamental provisions, the AML prohibits certain types of administrative abuses believed to be prevalent in China and establishes a complex set of administrative agencies with broad powers to enforce the law. Anti-Monopoly Law and Practice in China is the first comprehensive treatment of the AML and the practice of antitrust law under this new system. Each chapter on the substantive provisions of the law includes practical advice on approaches to meeting the challenge of complying with the law's requirements, including analysis of

likely interpretations and applications of the AML based on precedents in related economic laws and actions by other administrative agencies. Where policy choices are uncertain, the text will explore probable developments in China based on comparable applications of competition laws in other jurisdictions.

Discourses of Cultural China in the Globalizing Age

By all accounts, China is the world leader in the number of legal executions. Its long historical use of capital punishment and its major political and economic changes over time are social facts that make China an ideal context for a case study of the death penalty in law and practice. This book examines the death penalty within the changing socio-political context of China. The authors' treatment of China' death penalty is legal, historical, and comparative. In particular, they examine; the substantive and procedures laws surrounding capital punishment in different historical periods the purposes and functions of capital punishment in China in various dynasties changes in the method of imposition and relative prevalence of capital punishment over time the socio-demographic profile of the executed and their crimes over the last two decades and comparative practices in other countries. Their analyses of the death penalty

The Politics of Law and Stability in China

The explosive economic development in China over the last three decades has created social challenges unprecedented in the country's history. In response, China has overhauled its existing tort laws and even created new tort laws. By exploring its principles, theories and history, this book provides international readers a fresh outlook on China's tort law system. Granted that some concepts or theories in China's modern tort laws were "borrowed" from the west, the principles behind them can nevertheless often find their roots in ancient Chinese philosophies, concepts or even laws. This book also uses real cases to explain the courts' application of China's tort laws and the meaning of the corresponding statutes.

A prosperous economy goes hand in hand with a competent, impartial, and efficient legal system. This book - a product of the conference - highlights the newest opportunities and updates - for lawyers,

The book includes the conference's opening remarks, presented by the president of the AIA, Johan Billiet, who highlights the differences between Chinese and 'Western' arbitration. Other contributions include: the issue of mediation and arbitration in China * International Chamber of Commerce arbitration in China * arbitration differences between China International Economic and Trade Arbitration Commission and other Asian institutions, such as Hong Kong International Arbitration Center, Singapore International Arbitration Center, Korean Commercial Arbitration Board, and Japan Commercial Arbitration Association * recent developments in Chinese arbitration * the issue of recognition and enforcement of arbitral awards in China.

It gives me great pleasure to write a foreword to Mr. Sen's excellent book, and for two reasons in particular. In the first place, in producing it, Mr. Sen has done something which I have long felt needed to be done, and which I at one time had ambitions to do myself. When, over thirty years ago, and after some years of practice at the Bar, I first entered the legal side of the British Foreign Service, I had not been working for long in the Foreign Office before I conceived the idea of writing - or at any rate compiling - a book to which (in my own mind) I gave the title of "A Manual of Foreign Office Law." This work, had I ever produced it in the form in which I visualised it, could probably not have been published consistently with the requirements of official

Online Library Practice And Cases Of China Maritime Law

discretion. But this did not worry me as I was only contemplating something for private circulation within the Service and in Government circles. :Mr. Sen's aim has been broader and more public-spirited than mine was; but its basis is essentially the same.

The History and Theory of Legal Practice in China

More than any other area of regulation, antitrust economics shapes law and policy in the United States, the Americas, Europe, and Asia. In a number of different areas of antitrust, advances in theory and empirical work have caused a fundamental reevaluation and shift of some of the assumptions behind antitrust policy. This reevaluation has profound implications for the future of the field. The Oxford Handbook of International Antitrust Economics has collected chapters from many of the leading figures in antitrust. In doing so, this two volume Handbook provides an important reference guide for scholars, teachers, and practitioners. However, it is more than a merely reference guide. Rather, it has a number of different goals. First, it takes stock of the current state of scholarship across a number of different antitrust topics. In doing so, it relies primarily upon the economics scholarship. In some situations, though, there is also coverage of legal scholarship, case law developments, and legal policies. The second goal of the Handbook is to provide some ideas about future directions of antitrust scholarship and policy. Antitrust economics has evolved over the last 60 years. It has both shaped

Online Library Practice And Cases Of China Maritime Law

policy and been shaped by policy. The Oxford Handbook of International Antitrust Economics will serve as a policy and research guide of next steps to consider when shaping the future of the field of antitrust.

Anti-Monopoly Law and Practice in China

For over a decade China has been globally recognized as the leading recipient of antidumping measures. On the other hand, China's use of antidumping measures is equally noteworthy. Xiaochen Wu's timely book takes a very practical approach as it examines its subject in a broad context. Besides providing a rich and detailed interpretation of the legal provisions, it discusses complex technical aspects of the Chinese antidumping law in a very pragmatic way, notably by providing actual instances of their application in the antidumping investigations conducted by the Chinese Ministry of Commerce (MOFCOM). This book is also very handy since it consolidates detailed statistics pertaining to Chinese antidumping proceedings since 1997 as well as all important legal texts including China's antidumping law and the 15 MOFCOM implementing provisions along with relevant legal interpretation. Readers will quickly discover that the book is thoroughly enriched with the thoughtful commentary and pertinent observations of its author. Having addressed and understood antidumping matters both from the public and private sector perspective, Xiaochen Wu provides a very unique and extensive analysis of the Chinese antidumping law and its practice. In sum, this work incorporates the

essence of his personal experience as witnessed in the insightful examination of each antidumping provision and thoughtful reflections on complicated and exceptional situations which have come up in trade proceedings or which may very well arise in the not too distant future.
