The Range Rover's designers intended it to be a more comfortable and road-friendly passenger-carrying Land Rover, but customers quickly saw something much more in it. During the 1970s, while its immense practicality and capability were appreciated and acknowledged, a Range Rover became a sought-after and prestigious possession. It went on to change the face of Land Rover for ever. Range Rover First Generation - The Complete Story delves into the real story of the Range Rover, examining what lay behind the multiple changes in its twenty-six years of production. The book covers the full development story; custom and utility conversions; Range Rovers for the US market; full technical specifications and Range Rovers assembled overseas. If ever a car deserved the over-used epithet 'iconic', the first-generation Range Rover is it. The book provides an insight into the little-known difficulties and problems that were so well concealed by the Range Rover's makers and is a must read for all Range Rover and Land Rover enthusiasts.

Superbly illustrated with 223 colour and 97 black & white photographs.

Land Rover Defender, 90 and 110 Range - 30 Years of the Coil-Sprung 4x4 Models charts the evolution of the coil-sprung Defender vehicles. When Land Rover switched from leaf springs to coil springs for their utility models in 1983, it was a major step forward. The first coil-sprung model, the One Ten, replaced the Series III 109s. The short-wheelbase Ninety replaced the Series III 88s in 1984. From 1990, the models were all re-branded as Land Rover Defenders - 90, 110 and 140 - as the Land Rover range expanded and the marketing teams wanted a new name. Topics covered include: Origins of the Defender and early Ninety and One Ten Models; Development and use of the long-wheelbase models; Special conversions and Defenders built outside the UK, including in Australia and South Africa; Military and emergency service use of the Defender; Detailed examinations of engines and engineering, and the focus on diesel power; The future of the Defender. Charts the evolution of the coil-sprung Defender vehicles - the early 90 and 110 models from 1983 to present day. A must buy for all Land Rover enthusiasts. Superbly illustrated with 300 colour photographs. James Taylor is a well-known writer on classic motoring and a specialist on the Land Rover marque.

As U.S. and Canadian automakers and dealers face bankruptcy and Toyota battles unprecedented quality-control problems, Lemon-Aid guides steer the confused and anxious buyer through the economic meltdown unlike any other car-and-truck books on the market. Phil Edmonston, Canada's automotive "Dr. Phil" for more than 40 years, pulls no punches. In this all-new guide he says: Chrysler's days are numbered with the dubious help of Fiat. Electric cars and ethanol power are PR gimmicks. Diesel and natural gas are the future. Be wary of "zombie" vehicles: Jaguar, Land Rover, Saab, and Volvo. Mercedes-Benz - rich cars, poor quality. There's only one Saturn you should buy. Toyota - enough apologies: "when you mess up, 'fess up."
