Offering an anthology of original articles on sexuality from a sociological perspective, *Selves, Symbols, and Sexualities: An Interactionist Anthology* focuses on the diverse and multi-layered meanings of sexuality, sexual behaviors and sexual identities. Thomas S. Weinberg and Staci Newmahr bring you essays that explore sexuality as a social process. As a whole, the book takes the perspective that what each of us understands to be sexual is constructed through everyday social processes and interaction, situated in particular spaces and moments, identified through our social-sexual presentations, and symbolized through language, objects and practices. The book is organized around these four distinct but interrelated processes, and augmented by personal narratives around relevant issues. The authors' goals for the book are to engage students in the sociological enterprise by providing interesting and insightful entries that emphasize the importance of meaning-making in human sexuality, and to provide them with conceptual tools to understand human sexuality in a complex and quickly changing sexual landscape.

The classroom is a dynamic, interactive environment in which students are continually evaluating, questioning, debating, and in turn, shaping social reality. *Symbols, Selves, and Social Reality: A Symbolic Interactionist Approach to Social Psychology and Sociology, Third Edition*, provides students with a succinct, engaging, and affordable introduction to symbolic interactionism, the perspective that social reality is created, negotiated, and changed through the process of social interaction. Focusing on how elements of race and gender affect identity, authors Kent L. Sandstrom, Daniel D. Martin, and Gary Alan Fine use interesting, relevant real-world examples to discuss the personal significance of symbolic interactionism, its expanding theoretical scope, and its relationship to other prominent perspectives in sociology and social psychology. They skillfully cover empirical research topics that are inherently interesting to students, such as the dynamics of self-development, impression management, identity transformation, gender play, rumor transmission, and collective action. Thoroughly revised and updated in the third edition, this best-selling book now offers additional group assignments and activities at the end of each chapter in order to encourage student participation. Featuring updated case studies throughout, this edition also moves the section on theoretical perspectives to the beginning of the text, thereby providing students with a more thorough conceptual framework from the outset. Rich in pedagogical tools--including end-of-chapter summaries, key points and concepts, glossaries, readings lists, and discussion questions--*Symbols, Selves, and Social Reality: A Symbolic Interactionist Approach to Social Psychology and Sociology, Third Edition*, effectively demonstrates the tremendous power people have in determining social reality. Ideal for courses in symbolic interaction, individual and society, and social psychology, this unique text helps students understand how symbolic interactionism works, both in theory and in practice.

Distinguished psychologist G. William Domhoff brings together--for the first time--all the necessary tools needed to perform quantitative studies of dream content using the rigorous system developed by Calvin S. Hall and Robert van de Castle. The book contains a comprehensive review of the literature, detailed coding rules, normative findings, and statistical tables.

## **Finding Meaning in Dreams**

This study considers the effects of puberty and teenage sexuality on adolescents. By analyzing interviews with 55 teenagers, the author finds that girls' self-esteem drops significantly more than boys' does at adolescence. It considers different

explanations for this.

## **The Psyche of the Body**

The Psyche of the Body is a passionate and well-informed plea for a Jungian version of psychosomatic medicine and psychotherapy. Illustrated by vivid clinical illustrations of case histories, The Psyche of the Body reviews the long history of psychosomatic medicine and models of the relationship between psyche and body that have evolved over time, and presents a full revision of research in the field over the last twenty years. It presents a much-needed theoretical model together with practical guidelines that demonstrate how the psychological aspects of specific illnesses should be handled in therapy and analysis. Practicing and training Jungian analysts, as well as all those involved in clinical treatment, will find the interdisciplinary approach to psychosomatic medicine promoted in this book fascinating reading.

## **Sexuality, the Female Gaze, and the Arts**

Medieval courtiers defined themselves in ceremonies and rituals. Tournaments, Maying, interludes, charivaris, and masking invited the English and French nobility to assert their identities in gesture and costume as well as in speech. These events presumed that performance makes a self, in contrast to the modern belief that identity precedes social performance and, indeed, that performance falsifies the true, inner self. Susan Crane resists the longstanding convictions that medieval rituals were trivial affairs, and that personal identity remained unarticulated until a later period. Focusing on England and France during the Hundred Years War, Crane draws on wardrobe accounts, manuscript illuminations, chronicles, archaeological evidence, and literature to recover the material as well as the verbal constructions of identity. She seeks intersections between theories of practice and performance that explain how appearances and language connect when courtiers dress as wild men to interrupt a wedding feast, when knights choose crests and badges to supplement their coats of arms, and when Joan of Arc cross-dresses for the court of inquisition after her capture.

The American Drug Culture uses sociological and other perspectives to examine drug and alcohol use in U.S. society. The text is arranged topically, rather than by categories of drugs, and explores diverse contexts of drug use including popular culture; sexuality; the legal and criminal justice systems; other social institutions; and mental and physical health. It features more coverage of alcohol, the most widely-used drug in the U.S., than other texts for this course. Authors Thomas S. Weinberg, Gerhard Falk, and Ursula Falk include case studies from their field research to give you empathetic insights into the situation of those with substance and alcohol use disorders.

What shapes our sexuality? Is it a product of our genes, or of society, culture, and politics? How have concepts of sexuality and sexual norms changed over time? How have feminist theories, religion, and HIV/AIDS affected our attitudes to sex? Focusing on the social, political, and psychological aspects of sexuality, this Very Short Introduction examines these questions and many more, exploring what shapes our sexuality, and how our attitudes to sex have in turn shaped the wider world. Revealing how our assumptions about what is 'normal' in sexuality have, in reality, varied widely across time and place, this book tackles the major topics and controversies that still confront us when issues of sex and sexuality are discussed: from sex education, HIV/AIDS, and eugenics, to religious doctrine, gay rights, and feminism. ABOUT THE SERIES: The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area. These pocket-sized books are the perfect way to get ahead in a new subject quickly. Our expert authors combine facts, analysis, perspective, new ideas, and enthusiasm to make interesting and challenging topics highly readable.

The image of the West looms large in the American imagination. Yet the history of American Jewry and particularly of American Jewish women—has been heavily weighted toward the East. Jewish Women Pioneering the Frontier Trail rectifies this omission as the first full book to trace the history and contributions of Jewish women in the American West. In many ways, the Jewish experience in the West

was distinct. Given the still-forming social landscape, beginning with the 1848 Gold Rush, Jews were able to integrate more fully into local communities than they had in the East. Jewish women in the West took advantage of the unsettled nature of the region to “open new doors” for themselves in the public sphere in ways often not yet possible elsewhere in the country. Women were crucial to the survival of early communities, and made distinct contributions not only in shaping Jewish communal life but outside the Jewish community as well. Western Jewish women's level of involvement at the vanguard of social welfare and progressive reform, commerce, politics, and higher education and the professions is striking given their relatively small numbers. This engaging work—full of stories from the memoirs and records of Jewish pioneer women—illuminates the pivotal role these women played in settling America's Western frontier.

### **Sexuality: A Very Short Introduction**

This book provides practical, and direct information about sex, sexuality and sexual orientation. It is based on my long clinical experience in field of STI/HIV and on my personal philosophy on the concept of conditioning, sanity elements, belief system and e-point. The first half of the book discuss the role of the senses and the impact of conditioning on human self and sanity; and the second half explores the role of the environment (family, culture and the media) on human sexual desire and highlights the impacts of sex on humanity. I thank all the patients and people who share their stories with me and in the media (You Tube) and hope that this book will help to promote peace, love and sexual awareness.

### **Studies in Psychoanalysis**

Summary: "This book addresses the interaction of the media, sexuality and self-efficacy in teenage women. In doing so, it is also inclusive of class and power issues and the perceptual reactions of young women to an increasingly sexualized media. It includes a combination of qualitative and quantitative research examining the interaction of self-efficacy, as individual empowerment, with sexualized media imagery. It demonstrates how sexualized images projected by advertising, and the media in general, are perceived as power by adolescent females. Power is defined as self-efficacy or a personal power. Sexualized imagery proved to be an indicator of perceptions of both empowerment and a stratified class structure, with the more sexualized the imagery, the higher the perception of both self-efficacy and high social status or class. The book provides an in-depth exploration of young women's perceptions of sexuality and power. Additionally, the book examines sexualized imagery from a historical standpoint and as a component in adolescent sexual development."--Publisher description.

#### **African American Natural Hair as a Symbol of Self**

Sexuality is both fascinating and troubling. It seems to promise that transcendence of ourselves which is our deepest human desire, and yet it makes us painfully

aware of our limits and of the supreme difficulty of finding ourselves in the process of losing ourselves. The relationship of Christianity to sexuality has been particularly troubled, but this book is an attempt to reflect on the phenomenon of sexuality from the standpoint of what is central to Christianity, that is, the view of God and of the human condition which became real in the words and in the life of Jesus of Nazareth. The book tries to answer this question: if we take Christianity seriously, how do we think about our sexuality and what do we do about it? This book draws on the ethical reflections of many thinkers, and it draws on much work in psychology, but its primary focus is either that of ethics or of psychology. The book intends to be theology: the attempt to talk intelligently about God and the relationship of God to every area of human existence and especially to those aspects of life which are near the center of the human personality: and foremost among such is sexuality.

### **Body and Sexuality**

### **Self-Conditioning and Sexuality**

Since the publication of Foucault's History of Sexuality the volume of Classical scholarship on gender, sexuality and the body has steadily increased in tandem with the expansion of these topics in other areas of the Humanities. This volume will provide readers with a substantial selection of primary sources documenting sexualities, sexual behaviors, and perceptions of sex, sexuality, gender, and the body among people in the ancient Greco-Roman world. The coverage will begin with Homer in the eighth century BCE and will focus most heavily on Classical Greece and Rome from the Republic to the early Empire, though sources reflecting societal changes in later antiquity and a selection of Jewish and Christian readings will also be included. Authors will include Hippocrates, Plato, Aristotle, Galen, Ovid and Plutarch, with each chapter including one or two substantial 'focal' readings. The materials will include poetry, history, oratory, medical and philosophical writings, letters, and inscriptions, both public and private.

### **Human Sexuality Across the Life Span**

Critical Ethnography presents a fresh new look at critical ethnography by emphasizing the significance of ethics and performance in the art and politics of fieldwork. The book explores an ethics of ethnography while illustrating the relevance of performance ethnography across disciplinary boundaries. The productive links between theory and method are celebrated in this text. Theoretical concepts range from queer theory, feminist theory, and critical race theory to Marxism and phenomenology. The methodological techniques range from designing and asking in-depth interview questions and developing rapport to coding and interpreting data.

### **Liberation Between Selves, Sexualities, and War**

The second of three volumes in a series on women, the arts, and society, this collection of essays presents a range of definitions of the female gaze and

considerations of how gender and sexuality influence artistry and criticism. Bringing together important new perspectives on music, the visual arts, theater, film, literature, television, philosophy, and psychology, these essays taken together represent a cohesive revisionist look at the arts. Bisexuality and the female grotesque are subjects of essays devoted to how l'écriture feminine presents ways of seeing that challenge long-held assumptions about the artistic vision. Three essays discussing cinema look variously at sexuality in the earlier films of Susan Seidelman and in *The Unbearable Lightness of Being* as well as female madness as it is constructed in mainstream film. Subversions within the eighteenth-century romance novel, the voice of woman and Ovid's Echo and Narcissus, the quests for personal freedom by three Old French heroines - these are subjects of three essays providing historical context to the issues raised in this volume. The poetry of Adrienne Rich, Elizabeth Barrett Browning, Denise Levertov, Tess Gallagher, and Julia de Burgos is examined for images of women, sexuality, and perspective that each author creates.

Trothen (systematic theology and ethics, Queen's U., Canada) argues that the Church's approaches to sexuality and gender contributed to the length of time it took for the issue of violence against women to be identified as a concrete issue on its agenda. She reviews its long tradition of grappling with issues of sexuality and gender, then analyzes three case studies to demonstrate its contemporary approach. ### **Colette and the Conquest of Self**

From the polling place to the pulpit, *The Romance of Innocent Sexuality* investigates the passions that are enacted in debates about same-sex marriage. In a critique that is at once humorous and unrelenting, Geoffrey Rees argues that sexual desire is fundamentally a desire to make sense of oneself as a whole person. Through a constructive engagement with the writings of Saint Augustine on original sin, Rees turns on its head the conventional wisdom regarding the goodness of sexual relationship, arguing that sin, not innocence, is the starting point in pursuing justice in sexual ethics. To that end Rees boldly reclaims the wisdom of the most disreputable teachings of the Augustinian tradition: that original sin is a literal inheritance of all humanity of the singular disobedience of Adam and Eve in Eden, and the inherent sinfulness of all human sexuality. This work also engages theological readings of nineteenth-century fiction and literary readings of contemporary theological writings. In so doing Rees shows that debates about same-sex marriage are so compelling because the participants are all telling a common story in which they seek to establish the innocence of their own preferred forms of self-understanding as defined against some other persons'

sinful selves. In contrast to this, Rees argues for the acceptance of responsibility for the sinful exclusions that make possible finding the meaning of embodied personal identity through marriage between any two persons.

## **Bodies in Search of Self**

What role did sexual assault play in the conquest of America? How did American attitudes toward female sexuality evolve, and how was sexuality regulated in the early Republic? Sex and sexuality have always been the subject of much attention, both scholarly and popular. Yet, accounts of the early years of the United States tend to overlook the importance of their influence on the shaping of American culture. *Sex and Sexuality in Early America* addresses this neglected topic with original research covering a wide spectrum, from sexual behavior to sexual perceptions and imagery. Focusing on the period between the initial contact of Europeans and Native Americans up to 1800, the essays encompass all of colonial North America, including the Caribbean and Spanish territories. Challenging previous assumptions, these essays address such topics as rape as a tool of conquest; perceptions and responses to Native American sexuality; fornication, bastardy, celibacy, and religion in colonial New England; gendered speech in captivity narratives; representations of masculinity in eighteenth-century seduction tales, the sexual cosmos of a southern planter, and sexual transgression and madness in early American fiction. The contributors include Stephanie Wood, Gordon Sayre, Steven Neuwirth, Else L. Hambleton, Erik R. Seeman, Richard Godbeer, Trevor Burnard, Natalie A. Zacek, Wayne Bodle, Heather Smyth, Rodney Hessinger, and Karen A. Weyler.

The annual Lesbian Lives conference has been held in University College Dublin since 1993. The success of the conference held in 2006 entitled 'Historicising the Lesbian' inspired this collection of essays. From the dozens of papers delivered, the chapters chosen for inclusion in this volume cover a wide period in history from

the medieval to the very modern, a huge range of subject areas and diverse historical interests. The many subjects areas dealt with will allow a widening of our knowledge of lesbian history and encourage more in-depth investigation into the many issues raised within.
