Named one of the best books of 2019 by The Economist and a New York Times Book Review Editors' Choice. A National Jewish Book Award finalist. "A superb and touching book about the frailty of ties that hold together places and people." --The New York Times Book Review An award-winning historian shares the true story of a frayed and diasporic Sephardic Jewish family preserved in thousands of letters For centuries, the bustling port city of Salonica was home to the sprawling Levy family. As leading publishers and editors, they helped chronicle modernity as it was experienced by Sephardic Jews across the Ottoman Empire. The wars of the twentieth century, however, redrew the borders around them, in the process transforming the Levys from Ottomans to Greeks. Family members soon moved across boundaries and hemispheres, stretching the familial diaspora from Greece to Western Europe, Israel, Brazil, and India. In time, the Holocaust nearly eviscerated the clan, eradicating whole branches of the family tree. In Family Papers, the prizewinning Sephardic historian Sarah Abrevaya Stein uses the family's correspondence to tell the story of their journey across the arc of a century and the breadth of the globe. They wrote to share grief and to reveal secrets, to propose marriage and to plan for divorce, to maintain connection. They wrote because they were family. And years after they frayed, Stein discovers,

what remains solid is the fragile tissue that once held them together: neither blood nor belief, but papers. With meticulous research and care, Stein uses the Levys' letters to tell not only their history, but the history of Sephardic Jews in the twentieth century.

This publication covers critical topics such as jury charges, bench trial, opening statements, burdens of proof, trial motions, party and non-party witnesses, expert witnesses, summations, and bringing appeals. It includes numerous practice tips (Strategic Point, Warning, Timing and Exception) to ensure best practices and help the attorney make choices, avoid practice pitfalls and recognize important time limitations and exceptions to general rules. The online product includes practice forms.

A Practical Guide to Real Estate Practice

This book is a cultural history of Stein's rise to fame and the function of literary celebrity in America from 1910 to 1935. By examining not the ways that Stein portrayed the popular in her work, but the ways the popular portrayed her, this study shows that there was an intimate relationship between literary modernism and mainstream culture and that modernist writers and texts were much more well-known than has been previously acknowledged. Specifically, Leick reveals through the case study of Stein that the relationship between mass culture and modernism in America was less antagonistic, more productive and integrated than previous studies have suggested.

In this classic study of the relationship between technology and culture, Miles Orvell demonstrates that the roots of contemporary popular culture reach back to the Victorian era, when mechanical replications of familiar objects reigned supreme and realism dominated artistic representation. Reacting against this genteel culture of imitation, a number of artists and intellectuals at the turn of the century were inspired by the machine to create more authentic works of art that were themselves "real things." The resulting tension between a culture of

imitation and a culture of authenticity, argues Orvell, has become a defining category in our culture. The twenty-fifth anniversary edition includes a new preface by the author, looking back on the late twentieth century and assessing tensions between imitation and authenticity in the context of our digital age. Considering material culture, photography, and literature, the book touches on influential figures such as writers Walt Whitman, Henry James, John Dos Passos, and James Agee; photographers Alfred Stieglitz, Walker Evans, and Margaret Bourke-White; and architect-designers Gustav Stickley and Frank Lloyd Wright.

In this complete and approachable manual on grape growing in Texas, Jim Kamas asks the essential question all potential growers need to answer: Why do you want to plant a vineyard? Outlining the challenges and risks to all who think viticulture is a weekend hobby, Kamas then identifies the state's current grape growing regions and covers everything the commercial or home producer needs to know in order to have a successful vineyard. Well-illustrated text offers chapters on site choice and design, rootstock and fruiting varieties, pruning and training strategies, canopy and floor management, and disease and pest control. Kamas thoroughly explores grapevine horticulture, including the systematics, morphology, nutrition, and water needs of the genus *Vitis*. Finally, he addresses the issues of equipment and infrastructure before closing with some advice about vineyard-winery relations. Kamas was trained as a student in the grape growing country of western New York by some of the "best viticultural minds" in the US, and grape and wine lovers from all parts of the country will find this book a valuable resource.

City's 1970s punk heyday, by one of the icons of the city's golden age of new wave, Blondie's Chris Stein. A new collection of unseen photographs of New York City's 1970s punk heyday, by one of the icons of the city's golden age of music, Blondie's Chris Stein. For the duration of the 1970s - from his days as a student at the School of Visual Arts through the foundation of the era-defining band Blondie and his subsequent reign as epicenter of punk's golden age - Chris Stein kept an unrivaled photographic record of the downtown New York City scene. Following in the footsteps of the successful book *Negative*, this spectacular new book presents a more personal and more visceral collection of Stein's photographs of the era. The images presented here take readers from self-portraits in his run-down East-Village apartment to candid photographs of pop-cultural icons of the time and evocative shots of New York City streetscapes in all their most longed-for romance and dereliction. An eclectic cast of cultural characters - from William Burroughs to Debbie Harry, Andy Warhol to Iggy Pop - appear here exactly as they were in the day, juxtaposed with children playing hopscotch on torn-down blocks, riding the graffiti-ridden subway, or cruising the burgeoning clubs of the Bowery. At once a chronicle of one music icon's life among his punk and New-Wave heroes and peers, and a love letter to the city that was the backdrop and inspiration for those scenes, *Point of View* transports us to another place and time.

For proven guidance and techniques for handling a commercial real estate deal, this practical guide will help you negotiate and close the deal. The authors cover each step of a real estate transaction in the order in which it generally arises, and offers pertinent advice, practice comments, and sample forms throughout. Because much of the real estate lawyer's practice revolves around transactional documents, the book's chapters emphasize the drafting, negotiation, and revision needed to get a deal closed. Written by a law professor and two real estate practitioners, this book offers a useful combination of text overview and practice pointers. It helps lawyers with less experience navigate through the maze of

Racial and Ethnic Diversity in the Performing Arts Workforce

Written by a cult survivor and renowned expert on cults and totalitarianism, *Terror, Love and Brainwashing* draws on the author's 25 years of study and research to explain how almost anyone, given the right set of circumstances, can be radically manipulated to engage in otherwise incomprehensible and often dangerous acts. Illustrated with compelling stories from a range of cults and totalitarian systems,

from religious to political to commercial, the book defines and analyses the common and identifiable traits that underlie almost all these groups. It focuses on how charismatic, authoritarian leaders control their followers' attachment relationships via manipulative social structures and ideologies so that, emotionally and cognitively isolated, they become unable to act in their own survival interests. Using the evolutionary theory of attachment to demonstrate the psychological impact of these environments, and incorporating the latest neuroscientific findings, Stein illustrates how the combined dynamic of terror and 'love' works to break down people's ability to think and behave rationally. From small local cults to global players like ISIS and North Korea, the impact of these movements is widespread and growing. This important book offers clarity and a unique perspective on the dynamics of these systems of control, and concludes with guidance to foster greater awareness and prevention. It will be essential reading for mental health professionals in the field, as well as policy makers, legal professionals, cult survivors, and their families, as well as anyone with an interest in these disturbing groups. Students of social and developmental psychology will also find it fascinating.

hysterectomies—not to mention the Pill, cramps, the history of underwear, and the movie about puberty they showed you in 5th grade. Flow answers such questions as: What's the point of getting a period? What did women do before pads and tampons? What about new drugs that promise to end periods—a hot idea or not? Sex during your period: gross or a turn-on? And what's normal, anyway? With color reproductions of (campy) historical ads and early (excruciating) femcare devices, it also provides a fascinating (and mind-boggling) gallery of this complex, personal and uniquely female process. As irreverent as it is informative, Flow gives an everyday occurrence its true props – and eradicates the stigma placed on it for centuries.

“This superbly succinct and incisive book couldn’t be more timely or urgent.” —Michael Sorkin, author of *All Over the Map* Our cities are changing. Around the world, more and more money is being invested in buildings and land. Real estate is now a \$217 trillion dollar industry, worth thirty-six times the value of all the gold ever mined. It forms sixty percent of global assets, and one of the most powerful people in the world—the president of the United States—made his name as a landlord and developer. Samuel Stein shows that this explosive transformation of urban life and politics has been driven not only by the tastes of wealthy newcomers, but by the state-driven process of urban planning. Planning agencies provide a unique window into the ways the state uses and is used by

capital, and the means by which urban renovations are translated into rising real estate values and rising rents. Capital City explains the role of planners in the real estate state, as well as the remarkable power of planning to reclaim urban life.

Marc Stein's City of Sisterly and Brotherly Loves is refreshing for at least two reasons: it centers on a city that is not generally associated with a vibrant gay and lesbian culture, and it shows that a community was forming long before the Stonewall rebellion. In this lively and well received book, Marc Stein brings to life the neighborhood bars and clubs where people gathered and the political issues that rallied the community. He reminds us that Philadelphians were leaders in the national gay and lesbian movement and, in doing so, suggests that New York and San Francisco have for too long obscured the contributions of other cities to gay culture.

Racial and Ethnic Diversity in the Performing Arts Workforce examines the systemic and institutional barriers and individual biases that continue to perpetuate a predominately White nonprofit performing arts workforce in the United States. Workforce diversity, for purposes of this book, is defined as racial and ethnic diversity among workforce participants and stakeholders in the performing arts, including employees, artists, board members, funders, donors, educators, audience, and community members. The research explicitly uncovers the sociological and psychological reasons for inequitable workforce policies and practices within the historically White nonprofit performing arts sector, and provides examples of the ways in which transformative leaders, sharing a multiplicity of cultural backgrounds, can collaboratively and collectively create and produce a culturally plural community-centered workforce in the performing arts.

A practicing pediatrician for 23 years and director of the International Family Clinic in Burlington, North Carolina for the past 16, Dr. Rosemary Stein is a highly-regarded expert in childhood development. In "Who Needs a Village? It's a Mom Thing" Dr. Stein explains how modern parenting has created a generation of children lacking the confidence and skills to succeed in the real world - and tells parents (and moms especially) what they need to do to get their kids back on track. Raised in both America and her parents' native Dominican Republic, Dr. Stein reveals how her perspective was shaped by her own experiences growing up in those very different cultures. With unflinching honesty, she discusses the personal struggles - and occasional failures - that helped lead to the understandings about children and

their needs that have proven so successful in her own practice. Above all, she says, moms must learn to reclaim their innate power; ensuring that they can no longer be bullied by societal pressures, or other parents or, as is all too often the case, their own children. As its title suggests, "Who Needs a Village? It's a Mom Thing" takes on much that in our increasingly undemanding society has become conventional parenting wisdom. It pulls no punches in its insistence that no job is more important than that of a parent - or in its message that that job cannot be done nearly as well by anyone else. But her overriding concern is to build sturdier children by reversing the current disastrous trend, and she is ready and willing to take the heat.

A NEW YORK TIMES NOTABLE BOOK OF 2020 From the bestselling author of Nixonland and The Invisible Bridge comes the dramatic conclusion of how conservatism took control of American political power. Over two decades, Rick Perlstein has published three

definitive works about the emerging dominance of conservatism in modern American politics. With the saga's final installment, he has delivered yet another stunning literary and historical achievement. In late 1976, Ronald Reagan was dismissed as a man without a political future: defeated in his nomination bid against a sitting president of his own party, blamed for President Gerald Ford's defeat, too old to make another run. His comeback was fueled by an extraordinary confluence: fundamentalist preachers and former segregationists reinventing themselves as militant crusaders against gay rights and feminism; business executives uniting against regulation in an era of economic decline; a cadre of secretive "New Right" organizers deploying state-of-the-art technology, bending political norms to the breaking point—and Reagan's own unbending optimism, his ability to convey unshakable confidence in America as the world's "shining city on a hill." Meanwhile, a civil war broke out in the Democratic party. When President Jimmy Carter called Americans to a new ethic of austerity, Senator Ted Kennedy reacted with horror, challenging him for reelection. Carter's Oval Office tenure was further imperiled by the Iranian hostage crisis, the Soviet invasion of Afghanistan, near-catastrophe at a Pennsylvania nuclear plant, aviation accidents, serial killers on the loose, and endless gas lines. Backed by a reenergized conservative Republican base, Reagan ran on the campaign slogan "Make America Great Again"—and prevailed. Reaganland is the story of how that happened, tracing conservatives' cutthroat strategies to gain power and explaining why they endure four decades later.
