This book comprehensively covers the knowledge and skills that physicians, medical students and mid-level providers (physician assistants and nurse practitioners) need in order to care for patients with plant or arthropod exposures. It presents the epidemiology, pathogenesis and clinical manifestations of selected exposures, before discussing prevention strategies and management options for adverse cutaneous reactions and selected systemic manifestations. Lastly, it reviews emerging viruses carried by arthropods and related human diseases, such as the Zika virus. Dermatological Manual of Outdoor Hazards covers a broad range of arthropod and plant exposures, with a specific focus on dermatological manifestations, making it a valuable resource for all trainees and practicing dermatologists, primary care physicians and emergency physicians who treat these patients.

The de Havilland Tiger Moth biplane is an iconic and instantly recognisable aircraft. It is also one of a handful of planes that attracts the widest possible recognition outside the specialist group. Of nearly 10,000 built, it is thought that more than 1,000 Tiger Moths still survive over six decades on, and over half remain airworthy. They are

This book can be downloaded as a PDF file from [here](#). TRAVANCORE STATE MANUAL was written in the closing years of the 1800s. It is a fascinating book in that the perspective of historical events that took place in the region known as the Indian Peninsula is markedly different from what is being taught in current day schools and colleges. There is need to bring this book out in a very readable form. That is what has been attempted here. VED from VICTORIA INSTITUTIONS has written a foreword, which aims to elucidate the various differences in perspective, and also tries to focus on varying issues which are nowadays, hidden away from public knowledge. What ultimately comes out as background of unvarying strength is the fact that the English rule, especially that by the English EAST INDIA COMPANY was really of benign qualities, towards the common man of this area. This book contains the story of an independent kingdom at the southern most end of the Indian Peninsula, which lost its independence in 1947, in the wake of a fool coming to power in England.
