The Kawasaki Triples Bible covers the entire production of three cylinder two-strokes from 1967 to 1980, featuring a year by year breakdown of bike specs, including the KH250, 350 S2, KH400, H1 500 and H2 750 models. Illustrated with hundreds of archive photographs and period adverts, plus personal memories from some of the racers and tuners who got the best from the fearsome H1 500 and H2 750 machines of the 60s and 70s, this is an invaluable resource for any collector or restorer of these fabulous motorcycles. With information provided by Kawasaki Museum, acknowledged experts such as Rick Brett and Dave Marsden, and lifelong Kawasaki triples owners, it defines the enduring appeal of the models. It also contains excellent tips on spares, tuning, rebuilds etc., and captures the very essence of what made the Kawasaki triples the most rebellious, kick-ass two-strokes of their time.

This new edition of The Treatment of Pain with Chinese Herbs and Acupuncture gives a thorough and analytical review of the diagnosis and treatment options for

pain, using acupuncture with Chinese herbal medicine. Based on the clinical experience of the author and supported by that of acupuncturists in Chinese universities, it offers a comprehensive and detailed set of treatments for a wide variety of pain symptoms and conditions, and includes detailed modifications of the treatments, to aid clinical practice. Although pain syndromes are often complicated, involving both psychological and physical difficulties, resulting in sometimes hesitation in deciding a correct treatment, there are still some short-cut ways to achieve a successful result. Therefore, the essential intentions of the authors are very clear: To demonstrate the practitioners how to differentiate the clinical situations and how to establish the corresponding treatments. To illustrate how to apply Chinese herbs logically and how to consist an acupuncture prescription reasonably and effectively. Features - Thorough exploration of the aetiologies and pathologies for pain in the context of Traditional Chinese Medicine - Clear discussion of the principles of treatment, acupuncture point selection and combination - Detailed explanation of herbal and acupuncture treatments for common and complex pain conditions - Deals comprehensively with the commonest clinical presenting symptoms - Provides treatment plans and modifications to these plans, offering more options for the practitioner - Includes detailed and useful case histories New to this edition: New chapter on treatment of pain in children Separate sections for the gynecologic conditions Includes Western-named conditions Red Flags for practitioners to indicate situations which are potentially life-threatening or dangerous Suggested treatments now include acupuncture as well as herbal treatments Following on from each treatment a prognosis is now provided

In the old days all a person needed to build a killer custom motorcycle was a bike, a set of tools, a little know-how, and a creative vision. But with the rise of the high-dollar, haute moteur Gucci choppers, the true custom bike has gotten out of most riders' reach, right? Dead wrong. In this book Jose de Miguel, a custom builder from way back, sets out to prove that those good old days never ended. In the clearest and simplest terms, he shows readers how they can turn odds and ends found around the shop into one-off motorcycle parts--and make a cheap, run-of-the mill custom build into a drop-dead show stopper. Following de Miguel's lead, along with his straightforward illustrations, any resourceful owner with rudimentary mechanical skills, a basic tool kit, and--most importantly--a modicum of imagination can build the bobber of his dreams for less than the price of a new bike.

The urge has found you daydreaming more than once. The urge to define, bend, shape, fabricate, invent, shove, break. To slide your leg over the seat you finally got back from the leather shop. To twist back the throttle grip you wrapped yourself. To lunge into the darkness of an open highway on a creation all your own. More than a motorcycle, this is about your identity. It's about building something as unique as you are. In *The Build*, Robert Hoekman Jr compiles insights from today's best builders to help you plot out your own beautiful beast. Loaded with photos, *The Build* features firsthand advice from the masters of moto design, including John Ryland (Classified Moto), Alan Stulberg (Revival Cycles), Jared Johnson (Holiday Customs), Jarrod DelPrado (DP Customs), and the legendary Max Hazan (Hazan Motorworks). You've seen what can be done. It's time to do it yourself. Get *The Build*.

Suspension is probably the most misunderstood aspect of motorcycle performance. This book, by America's premier suspension specialist, makes the art and science of suspension tuning accessible to professional and backyard motorcycle mechanics alike. Based on Paul Thede's wildly popular Race Tech Suspension Seminars, this step-by-step guide shows anyone how to make their bike, or their kid's, handle like a pro's. Thede gives a clear account of the three forces of suspension that you must understand to make accurate assessments of your suspension's condition. He outlines testing procedures that will help you gauge how well you're improving your suspension, along with your riding. And, if you're inclined to perfect your bike's handling, he even explains the black art of chassis geometry. Finally, step-by-step photos of suspension disassembly and assembly help you rebuild your forks and shocks for optimum performance. The book even provides detailed troubleshooting guides for dirt, street, and supermoto--promising a solution to virtually any handling problem.
