Jesus and the Samurai

By 250 AD, Christianity had spread throughout India and China. Known as the Shining Religion or the Luminous Teaching, it drew adherents from Buddhism and Hinduism who were seeking a faith that taught the possibility of achieving a society founded on love and compassion for their fellow man. The new doctrine reached the island nation of Japan where it was so well received that Christianity threatened to supplant Buddhism as the dominant religion. By the close of the 16th century Japanese Christians numbered in the millions. Fifty years later Christianity was officially proscribed and Christians faced execution for openly practicing their faith. Jesus and the Samurai tells their fascinating story with facts drawn from ancient and modern sources.

Preserving New York

In light of the tremendous changes that have come to the island of Borneo in recent decades, this volume takes a detailed historical look at the Borneo environment from native, colonial and national perspectives. It examines change and continuity in the economic, political and social dimensions of human-environment interactions. Reflecting the increasingly multidisciplinary nature of environmental history, the book brings together an international group of historians, anthropologists, geographers and social foresters, all looking through a historical lens at the environment in the Malaysian states of Sabah and Sarawak, and the Indonesian province of Kalimantan and Brunei. Drawing on extensive archival research and fieldwork, these ten original contributions encompass eleven centuries of history on Borneo, examining interrelated topics that include long-distance trade, conservation, land tenure, resource access, property rights, perceptions of the environment, migration, and development policy and practice. The chapters in this volume are extensively revised versions of selected papers presented at an international seminar on "'Environmental change in native and colonial histories of Borneo: Lessons from the past, prospects for the future'" held in Leiden under the auspices of the International Institute for Asian Studies.

Preserving New York is the largely unknown inspiring story of the origins of New York City's nationally acclaimed landmarks law. The decades of struggle behind the law, its intellectual origins, the men and women who fought for it, the forces that shaped it, and the buildings lost and saved on the way to its ultimate passage, span from 1913 to 1965. Intended for the interested public as well as students of New York City history, architecture, and preservation itself, over 100 illustrations help reveal a history richer and more complex than the accepted myth that the landmarks law sprang from the wreckage of the great Pennsylvania Station. Images include those by noted historic photographers as well as those from newspaper accounts of the time. Forgotten civic leaders such as Albert S. Bard and lost buildings including the Brokaw Mansions, are unveiled in an extensively researched narrative bringing this essential episode in New York's history to future generations tasked with protecting the city's landmarks. For the first time, the story of how New York won the right to protect its treasured buildings, neighborhoods and special places is brought together to enjoy, inform, and inspire all who love New York.
